#### Tutor's Comments

Qingchuan has performed admirably across most of his academic subjects this year. Outside the classroom, he has participated in the Singapore and Asian Schools Mathematics Olympiad and received the Gold Award. Qingchuan has been a keen participant in Inter-House events and has been involved in all Inter-House sports competitions this year. He is highly encouraged to continue participating actively in House activities next year. Qingchuan is encouraged to voice his opinions more confidently and show more enthusiasm for tutor-time activities. He should also focus on improving his time management and work towards being more punctual next year.

Gavin Kinch  
Principal

Sandra Sng  
House Tutor

#### Curriculum for Year

Students develop skills in Chinese language through 1) narrative writing, situational writing, source-based essay writing, argumentative essay writing. (2) Informal, formal email and blog writing. (3) Comprehension and cloze passages. (4) Oral practice. (5) Editing skills. (6) Summary skills. Students applied their Chinese language skills through newspaper article reviews, work sheets, class presentations, spellings, dictations, poem recital and written assignments.

#### Achievements

Qingchuan is a well-mannered and cheerful student with a strong foundation in Chinese. He is able to connect new concepts to prior knowledge quickly and effectively. Receptive to feedback, he readily engages in self-reflection to improve his performance. His consistent effort and positive attitude towards learning have contributed to his commendable academic progress.

#### Targets for Development

Qingchuan is encouraged to read widely for leisure to acquire more complex vocabulary and sentence structures. Additional practice in reading comprehension will help him become more adept at handling various types of questions. During the holidays, he should also focus on reading more Chinese literature to better prepare for the upcoming academic year. By staying focused and motivated, he can attain results that truly reflect his level of language proficiency.

#### Curriculum for Year

The inaugural year of Commerce for the Year 2 cohort in 2025 was a significant success, establishing a strong foundation for future IGCSE studies in Economics and Business Studies. Students were introduced to crucial core economic principles such as Scarcity, Opportunity Cost, Needs versus Wants, and the Factors of Production. The curriculum was deliberately designed to connect these theoretical concepts to the real-world through extensive case studies and practical examples, allowing students to analyse the goals of the firm (profit, revenue) and the critical role of Corporate Social Responsibility (CSR) in modern business. This practical focus was cemented through several hands-on projects, including the study of successful enterprises and their branding strategies and the highlight of the year: the Mini Shark Tank Challenge, where students successfully applied their integrated knowledge to research, develop, and present compelling business proposals.

#### Achievements

Qingchuan has successfully developed a strong rapport and cultivated a great group of friends throughout the year, establishing himself as a highly reliable and popular member of the cohort. While he naturally tends toward being reserved in the larger classroom setting, he is a valuable contributor in small group discussions, where he reliably shares well-considered views.

Academically, Qingchuan's performance indicates that his conceptual foundation is still developing, and he requires additional focus to effectively transfer learned theory into complex written application. To maximize his learning, Qingchuan needs to proactively overcome his reserved nature by consistently seeking clarification from the teacher after a lesson and dedicating time to practicing the critical thinking required for nuanced, high-level written responses. His strong social skills are a major asset that will help him succeed as he focuses on strengthening his academic output.

#### Targets for Development

Qingchuan would benefit from developing patience and a better understanding of the diverse abilities and personalities among his peers, which will help him build stronger relationships. Additionally, he needs to develop his higher-order thinking skills to better see the connections between theory and the real world. This can be achieved by reading widely and thinking critically about issues.

## End-Of-the-Year Report 2025

### Subject Teacher's Report

**Name:** Ma Qingchuan  
**Tutor Group:** 2-THO  
**Subject:** English Lan & Lit

| English Lan & Lit<br><i>Ms L Gates</i> | Term 1 |    |    | Term 2 |    |    | Term 3 |    |    | Term 4 |    |    | Overall     |          |
|----------------------------------------|--------|----|----|--------|----|----|--------|----|----|--------|----|----|-------------|----------|
|                                        | SA     | AL | CW | SA     | AL | CW | SA     | AL | CW | SA     | AL | CW | Subject Ach | Year End |
|                                        | 4      | 4  | 4  | 4      | 6  | 6  | 5      | 5  | 5  | -      | 5  | 5  | 4           | 3        |

#### Curriculum for Year

Students studied a wide range of texts, including poetry, Shakespeare's Macbeth, creative writing, and the novel Genesis Begins Again by Alicia D. Williams. Through these works, they examined important issues such as colourism, while also developing an appreciation of themes and characterisation. Over the course of the year, they strengthened their ability to analyse how writers use language to convey meaning and expanded their own creative writing skills. A close analysis of the language in Genesis Begins Again formed the Reading section of their end-of-year examination, while the Writing section focused on producing a descriptive response, designed to test their ability to write with detail and control.

#### Achievements

Qingchuan has made clear progress in his descriptive writing, demonstrating the ability to structure his ideas logically and use language techniques effectively to enhance imagery. Additionally, he has developed his analytical skills through the study of various texts, showing an increasing ability to explore themes and characters. Qingchuan is becoming more confident in articulating his analysis through well-structured essay writing.

#### Targets for Development

Qingchuan would benefit from incorporating precise vocabulary and a wider variety of sentence structures to further improve his descriptive writing. Additionally, he should focus on his analysis in essays by exploring how language and literary techniques contribute to meaning in more depth in his analytical essays. Qingchuan is encouraged to engage in extracurricular reading to help expand and enrich his vocabulary. Concentrating on these areas will support his continued progress in English.

**Subject:** Geography

| Geography<br><i>Mrs C Koh</i> | Term 1 |    |    | Term 2 |    |    | Term 3 |    |    | Term 4 |    |    | Overall     |          |
|-------------------------------|--------|----|----|--------|----|----|--------|----|----|--------|----|----|-------------|----------|
|                               | SA     | AL | CW | SA     | AL | CW | SA     | AL | CW | SA     | AL | CW | Subject Ach | Year End |
|                               | 3      | 5  | 5  | 4      | 6  | 5  | 5      | 5  | 5  | -      | 6  | 6  | 4           | 4        |

#### Curriculum for Year

In Year 2 Geography, students explored how natural and human processes shape our world through three main topics: Our Risky World, Population Dilemmas, and Urban Environments. They learned about earthquakes and volcanoes and how societies manage natural hazards; examined patterns of population growth, decline, and migration; and investigated the growth of cities, focusing on housing and sustainability. Students applied their learning through hands-on projects, including creating a video on a tectonic hazard of their choice, constructing a 3D slum model, and conducting fieldwork to assess how well their neighbourhood meets residents' needs. Throughout the year, they developed key geography skills in observation, data collection, interpretation, and the application of geographic ideas to real-world situations.

#### Achievements

Qingchuan has shown admirable patience to learn as he faces challenges with the English language and occasionally finds it difficult to fully engage with the content. He approaches lessons with a genuine willingness to try and learn. His calm, sweet-natured personality makes him a pleasure to have in the classroom, and he interacts thoughtfully and respectfully with his peers. He works steadily at his own pace, demonstrating perseverance and determination to understand new concepts. Overall, his warm character, patience, and positive attitude have contributed to a pleasant classroom environment, and the effort he has put into learning will serve him well in future subjects.

#### Targets for Development

To push his performance further, Qingchuan is encouraged to be more confident in expressing his own opinions and in developing evaluation skills. Revising regularly and reviewing past work for improvement will help consolidate his progress. His respectful attitude and pleasant disposition make him a valued presence in the classroom. With greater focus and intellectual curiosity, he can continue moving from steady achievement to consistent excellence.

### Subject Teacher's Report

**Name:** Ma Qingchuan  
**Tutor Group:** 2-THO  
**Subject:** Global Perspectives

| Global Perspectives<br><i>Mr A Chong</i> | Term 1 |    |    | Term 2 |    |    | Term 3 |    |    | Term 4 |    |    | Overall     |          |
|------------------------------------------|--------|----|----|--------|----|----|--------|----|----|--------|----|----|-------------|----------|
|                                          | SA     | AL | CW | SA     | AL | CW | SA     | AL | CW | SA     | AL | CW | Subject Ach | Year End |
|                                          | 5      | 5  | 5  | 7      | 6  | 6  | 6      | 6  | 6  | -      | 5  | 5  | 5           | -        |

#### Curriculum for Year

In Year 2 Global Perspectives, students build on the foundational skills developed in Year 1 to deepen their critical thinking and research abilities. The curriculum focuses on examination skills for the IGCSE Global Perspectives course, such as evaluating and comparing the strength of arguments, identifying perspectives, and applying research methodologies to test claims. Through topics like Transportation, Travel & Tourism, Change in Culture and Communities, Fuel and Energy, and Belief Systems, students engage with global issues from multiple viewpoints. They refine their ability to craft research questions, design and conduct investigations using questionnaires and interviews, and analyse data to draw meaningful conclusions. Emphasis is placed on effective communication and collaboration as students work in teams to synthesise their findings and present them through oral presentations. This inquiry-based approach develops independent, reflective learners who can think critically about real-world issues and express their perspectives with clarity and confidence.

#### Achievements

Qingchuan has shown determination in completing his oral and written tasks. His oral presentation reflected clear communication and confidence. His work demonstrates an ability to express ideas with focus and structure. He has been consistent in his engagement with class tasks. Overall, Forrest has maintained commendable progress this term.

#### Targets for Development

Qingchuan should work on completing written tasks consistently to reflect his potential. He would benefit from developing greater structure in his opinion pieces. His oral contributions can be enhanced by organising arguments more clearly. Practising critical evaluation will allow him to move beyond surface-level responses. His target is to develop both reliability and depth in his work.

## End-Of-the-Year Report 2025

### Subject Teacher's Report

**Name:** Ma Qingchuan  
**Tutor Group:** 2-THO  
**Subject:** History

| History<br><i>Ms S Kok</i> | Term 1 |    |    | Term 2 |    |    | Term 3 |    |    | Term 4 |    |    | Overall     |          |
|----------------------------|--------|----|----|--------|----|----|--------|----|----|--------|----|----|-------------|----------|
|                            | SA     | AL | CW | SA     | AL | CW | SA     | AL | CW | SA     | AL | CW | Subject Ach | Year End |
|                            | 5      | 4  | 4  | 4      | 5  | 5  | 3      | 4  | 3  | -      | 4  | 4  | 4           | 5        |

#### Curriculum for Year

In 2025, the Year 2 History students explored the causes, nature, and aftermath of World War I. They examined both the long-term and short-term factors that led to the outbreak of the war and learnt to articulate these causes effectively using the PEEL format. To understand the nature of the conflict, students undertook a research project that culminated in the creation of a Handbook for New Soldiers in World War I. Finally, they investigated the aftermath of the war from the perspectives of both the victors and the defeated nations.

Throughout the year, students were encouraged to approach history with an analytical mindset. They developed their skills in engaging critically with primary and secondary sources, drawing inferences from both pictorial and textual evidence, and identifying the underlying purpose behind historical sources. These experiences have strengthened their ability to think critically about historical interpretation and perspective.

#### Achievements

Qingchuan has shown improvement in his effort and performance, particularly in the year-end exam, achieving results that exceeded expectations. This demonstrates that when he is focused, determined, and takes greater responsibility for his work, he has the potential to make significant progress.

#### Targets for Development

As Qingchuan moves into a more rigorous curriculum next year, it will be important for him to develop consistency in his learning by reviewing material regularly, completing tasks independently, and submitting work promptly. Strengthening his analytical skills—such as breaking down complex problems, comparing different perspectives, and structuring ideas logically—will help him approach tasks with greater depth. Most importantly, he should focus on improving his language competency so that he can express his ideas clearly and confidently, both in writing and verbally. With sustained effort, timely completion of tasks, regular practice, and a proactive attitude, he can build independence, enhance his understanding, and achieve stronger academic outcomes.

**Tutor Group:** 2-THO  
**Subject:** Mathematics

| Mathematics<br><i>Ms M Lai</i> | Term 1 |    |    | Term 2 |    |    | Term 3 |    |    | Term 4 |    |    | Overall     |          |
|--------------------------------|--------|----|----|--------|----|----|--------|----|----|--------|----|----|-------------|----------|
|                                | SA     | AL | CW | SA     | AL | CW | SA     | AL | CW | SA     | AL | CW | Subject Ach | Year End |
|                                | 7      | 6  | 7  | 6      | 6  | 6  | 6      | 5  | 5  | -      | 6  | 5  | 6           | 6        |

#### Curriculum for Year

The students have completed their syllabus, covering the topics of Congruency & Similarity, Surds, Indices, Standard form, Expansion & Factorisation of Algebraic Expressions, Algebraic Manipulation & Formulae, Algebraic Fractions, Simultaneous Linear Equations, Linear Inequalities, Pythagoras' Theorem, Mensuration, Quadratic Equations and Graphs, Statistical Averages, Stem and Leaf Diagrams, Line & Rotational Symmetry. They have also been prepared sufficiently to take the end of year examination with proficient use of the graphic display calculator.

#### Achievements

Qingchuan demonstrates a broad knowledge and understanding of the syllabus. He integrates knowledge and skills from different areas of the course competently. He successfully applies mathematical principles in a variety of contexts and uses problem solving techniques in challenging situations. He recognises patterns and structures and is able to make generalisations. He is able to reason the significance of results and draw relevant conclusions. He communicates mathematics in a clear and effective manner. He uses technology proficiently.

#### Targets for Development

Qingchuan is a disciplined and independent learner and he has worked consistently well this year but did not perform to his fullest potential for the final examination. To move up to the next grade, he must ensure he gives himself sufficient time during the examination to check his work thoroughly before submission.

## End-Of-the-Year Report 2025

### Subject Teacher's Report

**Name:** Ma Qingchuan  
**Tutor Group:** 2-THO  
**Subject:** Physical Education

| Physical Education<br><i>Mr L Scurr</i> | Term 1 |    |    | Term 2 |    |    | Term 3 |    |    | Term 4 |    |    | Overall     |          |
|-----------------------------------------|--------|----|----|--------|----|----|--------|----|----|--------|----|----|-------------|----------|
|                                         | SA     | AL | CW | SA     | AL | CW | SA     | AL | CW | SA     | AL | CW | Subject Ach | Year End |
|                                         | 5      | 6  | -  | 6      | 6  | -  | 6      | 5  | -  | -      | 5  | -  | 6           |          |

#### Curriculum for Year

Physical Education is compulsory for all students in Years 1-4. In Year 2 pupils are able to learn and develop physical activity skills and social and interpersonal skills of the IB learner profile; with a particular focus on further developing fundamental skills and knowledge, as well as tactical awareness. Pupils are also challenged to be open-minded as new activities are introduced, such as disability and world sports. Pupils extend their ability in a range of sports such as Netball, Basketball, Football, Rugby, Touch Rugby, Badminton, Volleyball and Pickleball and learn about the importance of exercise for health in fitness activities. Personal, Social and Health Education topics are also learnt within the PE curriculum for Year 2 pupils.

#### Achievements

This year, Qingchuan has mostly worked well during his PE lessons and has made sound progress. Qingchuan has made good skill progression and has attempted to perform and apply more advanced skills. He shows some ability to select and apply skills appropriately, yet still needs to develop his ability to make decisions under pressure. Qingchuan has sound knowledge and understanding of rules, scoring systems and tactics in the sports which he has covered and will sometimes answer questions in class or discuss with other students to demonstrate this. Qingchuan is also willing to try new activities, such as those in the World Games and Disability Sport unit, showing adaptability and an ability to explore new ways of working and performing.

#### Targets for Development

Qingchuan should continue to practice his skills so he becomes more consistent when performing them and is comfortable experimenting with them in game situations. Qingchuan should also continue to consider the best ways to use his skills in games to demonstrate improved tactical awareness.

#### Curriculum for Year

The Junior Science Curriculum is a comprehensive two-year program aimed at preparing students for their subsequent IGCSE biology, chemistry, and physics curricula. In Year 2 Science, a diverse range of topics is covered, including (Biology) Cells and Levels of Organisation, Movement in and out of Cells, Biological Molecules, and Food and Human Digestion; (Chemistry) Atoms, Isotopes, Ions, and Molecules, Chemical Formulae and Equations, Physical and Chemical Changes, and Acids and Bases (alkalis); (Physics) Magnets and Electromagnets, Light, and Electricity. Practical skills such as recording data, analyzing information, drawing conclusions, and evaluating experimental methods are integral components of this curriculum, which fosters a holistic approach to learning science.

#### Achievements

Qingchuan has a positive learning attitude in class and is always willing to collaborate with his peers when in need. He has acquired broad knowledge of most facts in the syllabus and can effectively carry out experiments.

#### Targets for Development

Qingchuan has a good grasp of Chemistry and is making progress in Biology, with room for enhanced understanding in Physics. He can use mind mapping to revise immediately after each chapter. He can also read up on the syllabus for next year to prepare himself for the complexity of the new science course next year. In addition, he is advised to attend support sessions on a weekly basis to catch up on his conceptual understanding.

#### Curriculum for Year

The Year 2 students took the Arts subjects in a twice-weekly, one-term carousel structure. In Term 4, the students embarked on a project to produce a stop-motion animation based on a content related to food such as “food waste”, “food and memories”, and “food and cultures”. The students have the options to explore digital media, such as stop-motion applications, drawing software tools, digital music workstations and AI to generate more ideas or support their creative process to produce meaningful and fun content for this animation project. Working in pairs, the students developed their animation by drafting the storyline, storyboarding, character design, camera-shooting techniques, sound and music design as well as video-editing. They also engaged in peer review and self-reflection to develop and refine their final outcome.

#### Achievements

Qingchuan is a pleasant student who works well with his classmates in group work. He displayed inadequate drawing and painting abilities in the art assignments. In the Stop-Motion Animation Project, he demonstrated a limited understanding of animation principles and artistic concepts. There were minimal connections between ideas or content related to the given theme.

#### Targets for Development

Qingchuan is encouraged to plan designs more carefully to improve composition and visual cues. He can spend more time on pre-production, such as storyboarding and shot testing, to strengthen the outcome. Additionally, he can take more creative risks by experimenting with new ideas, techniques, or visual styles to make his animation more original and engaging.
