Homework Analysis

Picture Description

The image shows a park scene with a large dark tree trunk standing slightly left of the center in the foreground, its thick branches spreading upward and covered with many yellow leaves.

改法一（最推荐 逻辑更清晰）：

The image shows a park scene with a large dark tree trunk standing slightly to the left of the center in the foreground. Its thick branches spread upward and are covered with many yellow leaves.

改法二：

The image shows a park scene with a large dark tree trunk standing

slightly to the left of the center in the foreground, **with** its thick branches **spreading** upward and covered with many yellow leaves.

改法三:

The image shows a park scene with a large dark tree trunk standing slightly to the left of the center in the foreground, **and its** thick branches spread upward and are covered with many yellow leaves.

① 表示“在……左边”

to the left of

② its thick branches spreading upward and covered with many yellow leaves.

↓

主句 + , + 另一个主语结构 **X**

↓

不是完整句 (没有谓语动词)

修改方法分析:

一:

* 用句号断开 —— 两个完整句子

* 添加完整谓语动词: spread、are covered

二:

with + 名词 + doing / done → with 独立结构

整体结构: 主句, **with** + 名词 + 现在分词 / 过去分词 → 伴随状语结构

例子:

She stood there, with her arms crossed.

He ran out, with tears falling down his face.

The ground below is heavily covered with fallen yellow and brown leaves, with some green grass still visible.

The ground below is mostly covered by a thick layer of fallen yellow and brown leaves, although some green grass is still visible.

句子本身:

* 语法是对的

* 结构也完全成立 (with + 名词 + 形容词)

主句: The ground below is heavily covered...

with 结构: with some green grass still visible

BUT

有些内容不够地道, 以及逻辑不够顺畅

① heavily vs. mostly

如果 Forrest 想表达“落叶很厚”的话, 可以用 “is mostly covered by a thick layer of..”

② with 结构 vs. although 从句

* 落叶 (衰老) 和绿叶 (生机勃勃) 是“虽然”和“但是”的关系, 所以用 although 会比 “with” 展现出的逻辑更好

In the middle area, there is an open grassy field with several smaller trees scattered across it, and a person walking in the distance near the center-left.

改法一:

In the middle area, there is an open grassy field with several smaller trees scattered across it. A person is walking in the distance near the center-left.

改法二:

In the middle area, there is an open grassy field with several smaller trees scattered across it, **with** a person walking in the distance near the center-left.

① 改法一:

Forrest 的意思:

There is A with B and C.

B: several smaller trees scattered across it

C: a person walking in the distance near the center-left

↑ 不需要用逗号隔开 with 并列的两项内容 ↑

BUT

这个句子其实结构很长且复杂，容易出错。分开两个独立的句子会清晰很多

句子一:

In the middle area, there is an open grassy field with several smaller trees scattered across it.

句子二:

A person is walking in the distance near the center-left.

② 改法二:

* 把前面整个主句当作一个整体

In the middle area, there is an open grassy field with several smaller trees scattered across it,

* 后面的 with a person walking... 作为“伴随情况”修饰整个画面

结构: 主句 + 伴随 1 + 伴随 2

第一个 with 是 field 的内部构成

第二个 with 是整个画面的附加信息

IGCSE ESL Writing

新作文 ~~Challenging Teachers in Maths Class~~
 不是一个好标题
 标题要“J”，而不是用一个具体的例子
 因为题目的设定不是“数学课”
 注意和“超市的临期食品”这种题区分

Nowadays, classroom teaching is changing in schools, and students have more chances to take part in the class. [Some people think that students should challenge their teachers due to their respect for their teachers.] In my ~~opio~~ opinion, we should point out mistakes in ^{an} appropriate way.

→ 对啊，逻辑也不通呀！

论点 (普遍)
↓
解释 (普遍)
↓
例子 (具体)

Firstly, students should challenge teachers because it helps everyone understand Maths correctly and avoid learning wrong information. In Maths, one small mistake can cause many students to lose marks in homework and exams. For example, if a teacher expands $3(x+4)$ as $3x+4$ instead of $3x+12$, the whole class ^{“will”有点绝对，可改为“may”} will get wrong idea. Students can politely raise their hand and ask, “~~ah~~ Shouldn't we multiply 3 by both x and 4?” As the old saying goes “Plato is dear to me, but truth is dearer.”

为什么是 Math? → 应该作为具体例子

Secondly, challenging teachers can encourage ^{to think} students' ~~independently~~ thinking. Maths problems often have different methods, and students should learn to choose the best one. For instance, a geometry problem can often be solved in multiple ways by adding different auxiliary lines, each of which offers valuable insights and helps us arrive at the optimal solution. Therefore, encouraging classmates to contribute their problem-solving approaches benefits the entire class.

Overall, students should challenge their teachers in Maths class in a polite way. This not only helps the whole class avoid mistakes, but also makes learning ^{→ 更有效} ~~effectively~~ ^{→ more effective}.

Title

Challenging Teachers in Maths
Class

一起改:

- ① Students Should Not Be Afraid to Challenge Their Teachers
- ② Students Should Be Encouraged to Challenge Teachers

标题要表明立场，但是在题目没有具体事情/例子的时候，要用比较广的角度 (general)

区别这两个题目：

题目一：

In class, you discussed whether students should challenge their teachers when they realize that teachers might be wrong. (从大到小 → 用“数学课”例子来体现)

题目二：

In class, you discussed whether supermarkets should throw away food that is almost expired before they close every day. (从小到大 → 反映社会问题)

① 题目讨论：

所有课堂场景

所有老师

教学互动方式

！ 而不是只限于数学课 ！

② Challenging Teachers in Maths Class

主动缩小了讨论范围，可是题目没有限定学科呀！ It is slightly off focus!!!

虽然不算大错，但会影响内容分

Introduction

Some people think that students should challenge their teachers due to their respect for their teachers.

Some people think that students should challenge their teachers when they make mistakes, while others believe that they should not argue with their teachers due to their respect for their teachers.

① Forrest 抄错了

②

* 灰色部分（原文）只有一方观点

* 即使是一方观点，逻辑也不对

↓

challenge 老师，应该是因为 respect for knowledge 呀!

In my opinion, we should point out mistakes in a appropriate way.

小小错误，也要注意哈!

In my opinion, we should point out mistakes in an appropriate way.

Body Paragraph 1

Firstly, students should challenge teachers because it helps everyone understand Maths correctly and avoid learning wrong information.

一起改:

Firstly, challenging teachers helps ensure that knowledge is accurate and clearly understood.

① 论点带有例子 **X**

论点: 表明立场

例子: 证明论点

② 论点太长啦

长句 ≠ 高级

信息密度太高会让主旨不突出 (详细的内容留给 explanation)

In Maths, one small mistake can cause many students to lose marks in homework and exams.

In any subject, even a small mistake can lead to misunderstanding and affect students' performance in homework and exams.

原文: 太具体、太局限、太场景化

解释应该:

解释原理

提供逻辑

先概括, 再具体

另外, 这个“解释”也不够具体。

内容增加版:

In any subject, even a small mistake can lead to misunderstanding and affect students' performance in homework and exams. If an error is not corrected in time, it may be repeated and spread among classmates. As a result, students may build their knowledge on incorrect foundations.

... the whole class will get wrong idea.

... the whole class may get wrong idea.

“will” 语气非常绝对

还记得 **hedging** 吗?

只要老师错了, 全班一定都会错? 也可能有学生知道是错了, 但是没说而已

用 “may” 比较委婉

尽量**避免**:

all、always、never、will (绝对预测) ...

更**倾向**:

may、might、can、could、tend to、are likely to...

Body Paragraph 2

Secondly, challenging teachers can encourage student independent thinking.

Secondly, challenging teachers can encourage student to think independently.

① 结构:

encourage sb to do sth

② 如果想表达 “学生的独立思考 (能力)”

students' independent thinking

Maths problems often have different methods, and students should learn to choose the best one.	In many subjects, problems can be solved in different ways, and students should learn to choose the best one.
--	---

同 body paragraph 1:

论证要具有普遍性 (generalisability)

这个理由只适用于数学? 显然不是!

! 另外!

这段话有点跑题

没有明确和“challenge teachers”连接起来

本应该:

challenging teachers

→ leads to discussion

→ discussion exposes different methods

→ discussion exposes different methods

应该改成:

When students challenge their teachers, different methods can be discussed and compared.

再另外

! 这个分析内容不够充实 !

改:

When students challenge their teachers, different methods can be discussed and compared. This allows students to evaluate various approaches rather than simply accept one solution. As a result,

they develop critical thinking skills and a deeper understanding of the subject.

Conclusion

Overall, students should challenge their teachers in Maths class in a polite way.

Overall, students should not be afraid to challenge their teachers in a respectful and constructive manner.

同理，内容应该“泛化”

This not only helps the whole class avoid mistakes, but also makes learning effectively.

This not only helps most of the students avoid mistakes, but also makes learning more effective.

① the whole class 太绝对

② learning 是动名词，后面要用形容词修饰

Effectively（副词），修饰动词 or 形容词

如：

He works effectively. → 修饰动词

He is incredibly amazing. → 修饰形容词

New Writing Task - In-class Practising

Exercise 6

14 In class, you discussed whether students learn languages more effectively in smaller classes.

Here are some comments from your classmates:

Students get more chances to speak in small classes.

Group work can work even in bigger classes.

Teachers can give more individual attention.

Large classes offer more opportunities for peer learning.

Write an article for your school magazine, giving your views.

The comments above may give you some ideas, and you can also use some ideas of your own.

Your article should be between 100 and 150 words long.

You will receive up to 6 marks for the content of your article, and up to 6 marks for the language used.

正：支持小班课

① 发言机会多

↓
口语练习频率高 → 语言输出增加 → 更容易提升流利度

② 老师能关注到每个人

↓
及时纠错 → 减少错误固化 → 学习更精准

③ 随时调整课堂进度

↓
减少“跟不上”或“太简单”的情况 → 学习更高效

反：

① 小组合作

↓
人数多 → 容易组队 → 相互学习

② 经济实惠

↓
需要的师资少 → 上课成本更低 → 更多人有机会上课（普及）

③ 模拟更多情景

↓
大班 = 学生更多 → 能模拟餐厅、车站等人多的场景，学习不同的对话

④ 师生之间更容易建立信任

↓
建立信任 → 不害怕在老师前犯错 → 更加敢开口说

④ Peer learning

↓
语言环境丰富 → 能学习更多 idea+应对不同的对话

Introduction:

① background:

② different views:

③ Forrest's opinion:

Body Paragraph 1:

Point:

Explanation:

Example:

Link/point (what is the result):

Body Paragraph 2:

Point:

Explanation:

Example:

Point/Link (what is the result):

Conclusion:

Homework 1 - ARTICLE

完成 P13 ~ 14 的 Article

Homework 2 - Description
