Poor sleep quality is closely linked to anxiety and depression (Mayo Clinic).

Source 原文

Unhealthy social media

Social media use may have negative effects on some teens. It might:

- Distract from homework, exercise and family activities.
- Disrupt sleep.
- Lead to information that is biased or not correct.
- Become a means to spread rumors or share too much personal information.
- Lead some teens to form views about other people's lives or bodies that aren't realistic.
- Expose some teens to online predators, who might try to exploit or extort them.
- Expose some teens to cyberbullying, which can raise the risk of mental health conditions such as anxiety and depression.

↑ Mayo Clinic Staff ↑

Mayo Clinic 的原文并没有说到 poor sleep quality 和 anxiety 以及 depression 的关系，只是列举了 social media 的消极影响。

3. Addiction and Sleep Disruption: Excessive use of social media can lead to addiction, where young people feel compelled to constantly check their profiles and updates. This behavior can interfere with daily activities, academic performance, and sleep patterns. Poor sleep quality, in turn, is linked to various mental health issues, including anxiety and depression.

↑ ACC 的文章里面才有说到 ↑

“Poor sleep quality in turns, is linked to various mental health issues, including anxiety and depression.”

Examples:

Body Paragraph 1:

Supporters of social media emphasize its ability to strengthen relationships and provide emotional support. Social media allows teenagers to create online identities, chat with others, and build social networks beyond their immediate surroundings. In fact, research indicates that roughly three-quarters of teenagers feel more connected to their friends’ lives through social media (Faverio, Anderson and Park). This suggests that these platforms help maintain friendships, especially when people live far apart. **Research suggests that 63% of teenagers consider social media an opportunity to express their creativity (Faverio, Anderson and Park).** Through posting videos, artwork, or personal thoughts, young people are able to express themselves more freely. As a result, social media can increase teenagers’ sense of belonging and provide opportunities for creativity and communication that may not exist offline.

两个例子练习:

① Supporters of social media emphasize its ability to strengthen relationships and provide emotional support.

For example, teenagers who move to a new city or attend different schools can stay in contact with their old friends through messaging apps and social media platforms. By sharing photos, commenting on posts, and chatting regularly, they are able to maintain emotional connections despite physical distance, which helps reduce feelings of loneliness.

② Research suggests that 63% of teenagers consider social media an opportunity to express their creativity.

Minecraft → users upload videos → rebuilding famous landmarks in the world at 1:1 scale inside the game → creativity / humor → present + cultivate (From Forrest)

For example, some people use games like Minecraft as a creative platform. They may upload videos showing how they rebuild famous landmarks, such as the Forbidden City or the Great Wall, at a 1:1 scale inside the game. These projects require imagination, planning, and teamwork, and they often attract positive feedback from online audiences. Receiving recognition and support from others can encourage young people to continue exploring their creativity and developing new skills.

New Writing Task - In-class Practising

Exercise 6

14 In class, you have discussed whether it is important to develop children's talents.

Here are some comments from your classmates:

Children should have time to play, not just learn skills.

Talents might help them succeed in the future.

Kids can become more confident if they develop their talents.

Parents shouldn't force children to do things they don't like.

Write an article for your school magazine, giving your views.

The comments above may give you some ideas, and you can also use some ideas of your own.

Your article should be between 100 and 150 words long.

You will receive up to 6 marks for the content of your article, and up to 6 marks for the language used.

正：支持培养孩子的天赋

反：不支持培养孩子的天赋

① Talents can improve children's confidence

① Intensive training may cause pressure and reduce free time

a child performs well in a certain area → receives praise/positive feedback from others (teachers, parents, friends) → feels proud and encouraged → becomes more confident

heavy schedule/pressure → less time to play and relax → fewer chances to socialize with friends → weaker social skills or unhappiness

② Forcing children to learn talents

② Talents may bring more opportunities in the future they dislike may cause mental problems

gaining skills and achievements → competitions/awards/special experiences → better school or career opportunities → higher chance of success in the future doing something they might not enjoy → stress/frustration/loss of motivation → negative emotions or mental health problems → poor parent-child relationship
