Schools Should Teach Environmental Protection

Environmental problems are ^{becoming more serious / increasing} worsening today, leading to debates about whether schools should include environmental protection courses in their curriculum. Some people believe schools should teach it because students need to develop awareness from a young age. However, others

argue that parents should be responsible for this and that schools should teach environmental protection because education can help students become more responsible citizens. why do you mention school again?

↑ 以上内容: ①表达累赘 ②逻辑重复 所以是谁要负责呢?

Firstly, schools play an important role in shaping students' habits and attitudes. Students spend a large part of their day at school, which ^{需要一个过渡} means teachers have a strong influence on them. For example, schools can teach students practical actions such as recycling, saving electricity and reducing the use of plastic. Schools can also organise activities like

environmental campaigns or tree-planting ^{activities} events. Through these activities, students are able to practise what they learn instead of only hearing about it ~~in class~~. As a result, they can develop environmentally friendly habits that may continue throughout their ~~lives~~.

论点2和学校的联系是？
(Secondly, environmental education helps students understand the seriousness of global environmental problems.) ^{can be at home or school} Many young people may not fully realise how human activities affect the planet. ^{到此为止逻辑成立} By learning about topics such as pollution, climate change and waste management, students can understand the long-term consequences of these issues. For instance, they may realise how simple actions like reducing waste or saving water can make a difference. Therefore, students who receive environmental education ^{in class} are more likely to make responsible decisions and encourage others to protect the environment as well.

分析 理解环境问题的
↓ 长期后果
例子 采取简单的环保行动
→ 缺少说服力

In conclusion, although some people ^{believe that} environmental protection should mainly be taught by parents, schools ^{中立?} should also play an important role in educating students. Teaching environmental protection in schools can help students develop good habits and create a better future.
^{for what & for whom?}

Body Paragraph 1: 逻辑本身没错，但太跳跃了。

重点在易校和老师间切换，但无解释两者之间的关系。

Title

Excellent!!

Introduction

Environmental problems are worsening today, ...

Environmental problems are becoming more serious today, ...

句子本身没错，但是原文表达不自然

① problem 与 serious / severe 的搭配很常见

② problems are worsening → 语法正确，但不自然

worsen 常用在:

*the situation is worsening

*the climate crisis is worsening

*pollution levels are worsening

However, others argue that parents should be responsible for this and that schools should teach environmental protection because education can help students become more responsible citizens.

However, others argue that parents should be responsible for this. I believe that schools should teach environmental protection because education can help students become more responsible citizens.

观点前后矛盾了 (因为 Forrest **!!!抄错了!!!**)

前: parents should be responsible for this

后: schools should teach environmental protection

所以 Forrest 的观点是什么呢?

建议: 直接删掉“school”部分。或者写得详细点: However, others argue that parents should be responsible for teaching children how to protect the environment.

Body Paragraph 1

Firstly, schools play an important role in shaping students' habits and attitudes. Students spend a large part of their day at school, which means teachers have a strong influence on them.

Firstly, **schools** play an important role in shaping students' habits and attitudes. Since students spend a large part of their day at school, they are strongly influenced by **teachers, school rules and daily routines**. When certain behavior are practised regularly, they can gradually become long-term habits.

Forrest 原文：很短的逻辑跳跃 ↓

学校能塑造习惯 → 因为学生在学校时间长 → 所以老师影响大
逻辑对应补上，中间需要加内容连接

或者主语统一：

原文： **Students** spend a large part of their day at school, which means **teachers** have a strong influence on them. → 主语是学生，然后是老师

修改： **Students** spend a large part of their day at school, which means **they** are strongly influenced by their teachers. → 主语都是学生

Body Paragraph 2

Secondly, environmental education helps students understand the seriousness of global environmental problems.

Secondly, teaching environmental protection **in schools** helps students understand the seriousness of global environmental problems.

题目问： Should schools teach students about environmental protection?

但是 Forrest 写： environmental education helps students understand the seriousness of global environmental problems. → 环保教育有好处 → 答非所问

environmental education ≠ school education

因为 environment education 可以来自 parents、media、society、documentaries、social media 等等

Forrest 的论点本应该是“school responsibility”, 但现在是“environmental education benefits”

① By learning about topics such as pollution, climate change and waste management, students can understand the long-term consequence of these issue.

↓↓↓

② For example, they may realise how simple actions like reducing waste or saving water can make a difference.

By learning topics about pollution, climate change, and waste management, students can understand the long-term consequences of these issues. When students realise how serious environmental issues could be, they are more likely to understand that protecting the environment is their responsibility as well. As a result, they may start to take simple actions in their daily lives

↓↓↓

For example, they may learn how pollution can damage ecosystems or how climate change can lead to extreme weather events. When students understand these consequences, they may realise that simple actions like reducing waste or saving water can make a difference.

① (分析) 理解环境问题的长期后果

② (例子) 采取简单的措施也能有帮助

For example 应该用来举例说明前面 analysis 的内容, 但是 Forrest 从“后果”直接跳到了“环保行为”

也就是 Forrest 的逻辑是: 理解长期后果 → 例如: 减少浪费? (不是同一层面

的内容)

③ 更加符合逻辑的思路:

* 理解问题的严重后果

*!! 认识到需要保护环境!!

*因此采取行动

Conclusion

Although some people environment protection should mainly be taught by parents, school also play an important role in educating students.

Although some people **believe that** environment protection should mainly be taught by parents, **schools are in a better position** to provide systematic environmental education.

Or

While parents may teach children about environmental protection at home, **schools play a more important role** in providing systematic environmental education.

① 缺少谓语 believe

② 逻辑也不对

*父母要教

*学校也很重要

所以支持哪方? 没体现出来。要有侧重, 才能体现出 Forrest 支持的是谁。这更像一个 balanced position。(要有比较)

BUT 整篇文章前面两段一直在论证的是“为什么学校应该教环保”

Teaching environmental protection in schools can help students **develop good**

Teaching environmental protection in schools can help students **develop**

habits and create a better future.

environmentally friendly habits,
which may influence their future
behaviour and contribute to a more
sustainable future.

Forrest 原文的表达太笼统和抽象了，比较假大空。

① Teaching environmental protection → students develop good habits

② Teaching environmental protection → create a better future **X**

是 Teaching environmental protection helps students create a better future

而不是说 Teaching environmental protection creates a better future protection **V**

New Writing Task (Text C) - In-class Practising

Text C: Our big red bus ride

This text is about a journey that started in 1971 and went around the North American continent.

Gradually, out of the shimmering heat, a vehicle appeared – a big, red intrusion into the barren landscape. As it approached, a curious spectator would see a bus, a double-decker, bigger and noisier than the single-deckers they sometimes saw in that part of the world. It threw up clouds of dirt and dust as it passed. It shouldn't have been there, thousands of kilometres from England.

This is the story of that big, red double-decker bus. This isn't a children's story, and if you try reading it to children, they'll soon lose interest in the increasingly petty details of our daily life. In one early letter to my parents, I wrote: 'We had yet another meeting yesterday to sort out grievances.' This latest inquest had been into who'd drunk someone's orange juice from the fridge. The devastated owner knew some had been 'stolen' because he'd marked the level of the liquid in the bottle.

I did try to write a children's story one morning but was interrupted by shouts and a collision with something overhead. Group leader Roger had decided on buying a 'high-decker' (taller than average) and initially we left a trail of damaged overhead bridges, power cables and telephone lines wherever we went. This bus, our bus, had already covered many kilometres of faithful service before Roger purchased it secondhand. We'd each answered Roger's advert to travel around the world on this bouncing beast. We all had regular professions back home – a chef, a nurse and so on – and had come together to share an experience. We'd taken delivery of a 1955 green double-decker and decided to paint it red, the typical image of English buses. The bus company remained very supportive, including sending spares out whenever we encountered a mechanical crisis.

It's difficult to envisage how cut off from our previous lives we were back then. Mobile phones and emails weren't yet invented. There was no internet linking different countries and cultures. To phone home was expensive and public phones weren't easy to find. I was away two years and managed to phone home twice. Our world was inside that double-decker bus – an overloaded display case of rattling glass and metal on wheels. People stared in; we gazed out. The interior of the bus had been completely gutted, its normal entrance and exit doors sealed up. We gained access squeezing through the emergency door at the rear. Roger's new friend, Vic, was a skilled carpenter, magicking snug bunk beds and ingenious storage seats downstairs around an almost adequate kitchen area/ table. The seats were removable – disappearing to reveal various emergency supplies, spares and snacks nestled secretly beneath. No sliver of space escaped!

That bus traversed deserts and climbed mountains – setting an altitude record of 4000 metres for such a vehicle. Rumbling across continents, only lack of money for diesel threatened to halt its determined march. Beforehand, we'd hoped to sell advertising space on the side of the bus, but that didn't happen. Our targets each day were to make enough money from manual work – mostly fruit picking – to cover growing expenses, and to overcome any lumps, bumps and obstacles that lay ahead. A double-decker bus is a heavy, awkward

vehicle. On uneven or wet ground, it's less manoeuvrable than a whale in quicksand, but ever heard the expression 'You could get a double-decker bus through there?' Well, events proved that we could (until that fateful last day when it sank on a raft crossing a river – don't ask!).

We needed luck and to work together. Most of all we needed the bus to overcome conditions that it had never experienced in years of commercial service. The six of us who lasted the whole trip were two years older when we returned. Looking back, we displayed breathtaking naivety in assuming that we'd not be left stranded somewhere with no money and no hope of getting home.

Question 3

You are Vic. Shortly after the whole trip ends, you write a letter to a friend telling them about your experience.

In your letter you should:

- describe the preparations for the trip **and** how you came to be involved
- outline the different challenges faced once the journey began **and** how these were resolved
- explain what you think everyone learned through the experience **and** looking back what you all should have done differently and why.

Write the words of the letter.

Base your letter on what you have read in **Text C**, but be careful to use your own words. Address each of the three bullets.

Write about 250 to 350 words.

Up to 15 marks are available for the content of your answer and up to 10 marks for the quality of your writing.

Questions for Forrest:

Who are “you”? → Vic

Who are you writing to? → Forrest (any name you can think of)

用第几人称? → 第一人称 (I / my / we)

! TRY TO USE YOUR OWN WORDS !

4 Paragraph

Paragraph 1: 开头 - 这是什么旅行 (引入背景)

① 旅行结束后的感受 (简短引入即可)

Dear Forrest,

I’ve finally returned home after the long journey I told you about before, and now I want to share my experience with you. I can hardly believe that we managed to overcome so many difficulties. Our plan was to travel across North America in an old double-decker bus.

Paragraph 2: 旅行准备 (完整回答第一个 bullet point)

① 说明 Vic (我)为什么加入这个团队

I joined this trip as a carpenter because I saw Roger's advertisement. I thought my skills might be useful, so I decided to become part of the team.

② 旅行准备

*Roger 买了 二手双层巴士

*巴士 从绿色刷成红色

*完全拆空

*Vic 改造成生活空间

→ 建: bunk beds、storage seats、small kitchen

→ 利用所有空间放 supplies 和 emergency equipment

Paragraph 3: 旅途挑战 + 解决方法 (完整回答第二个 bullet point)

① bus 太高 → 撞桥、撞电线

② 没钱买柴油 → 解决办法: 停下来做 fruit picking 工作赚钱

③ bus 在 rough ground / mountain roads 上难开 → 解决办法: teamwork + patience

Paragraph 4: 学到的东西 + 反思 (完整回答第三个 bullet point)

① 学到了什么

Cooperation、determination、living together、solving problems together

② 应该做得不同的地方（反思）

they were naive、they should have planned finances better、should have prepared for difficulties

Homework 1 - LETTER

完成 P9 ~ 12 的 Letter

Homework 2 - ARTICLE

Exercise 6

- 14** In class, you discussed whether moving from rural areas to cities is a positive development.

Here are some comments from your classmates:

Cities offer more job opportunities and better education.

Too many people moving to cities can cause overcrowding.

Life in rural areas is quieter and healthier.

Cities provide more entertainment for young people.

Write an article for your school magazine, giving your views.

The comments above may give you some ideas, and you can also use some ideas of your own.

Your article should be between 100 and 150 words long.

You will receive up to 6 marks for the content of your article, and up to 6 marks for the language used.
