Manifest 显化 ≠ superstition 迷信

*Manifestation refers to the practice of visualizing your goals and maintaining a positive belief that they can happen.

*From a psychological perspective, it may work by increasing focus, motivation, and confidence, which can influence your behavior and decisions.

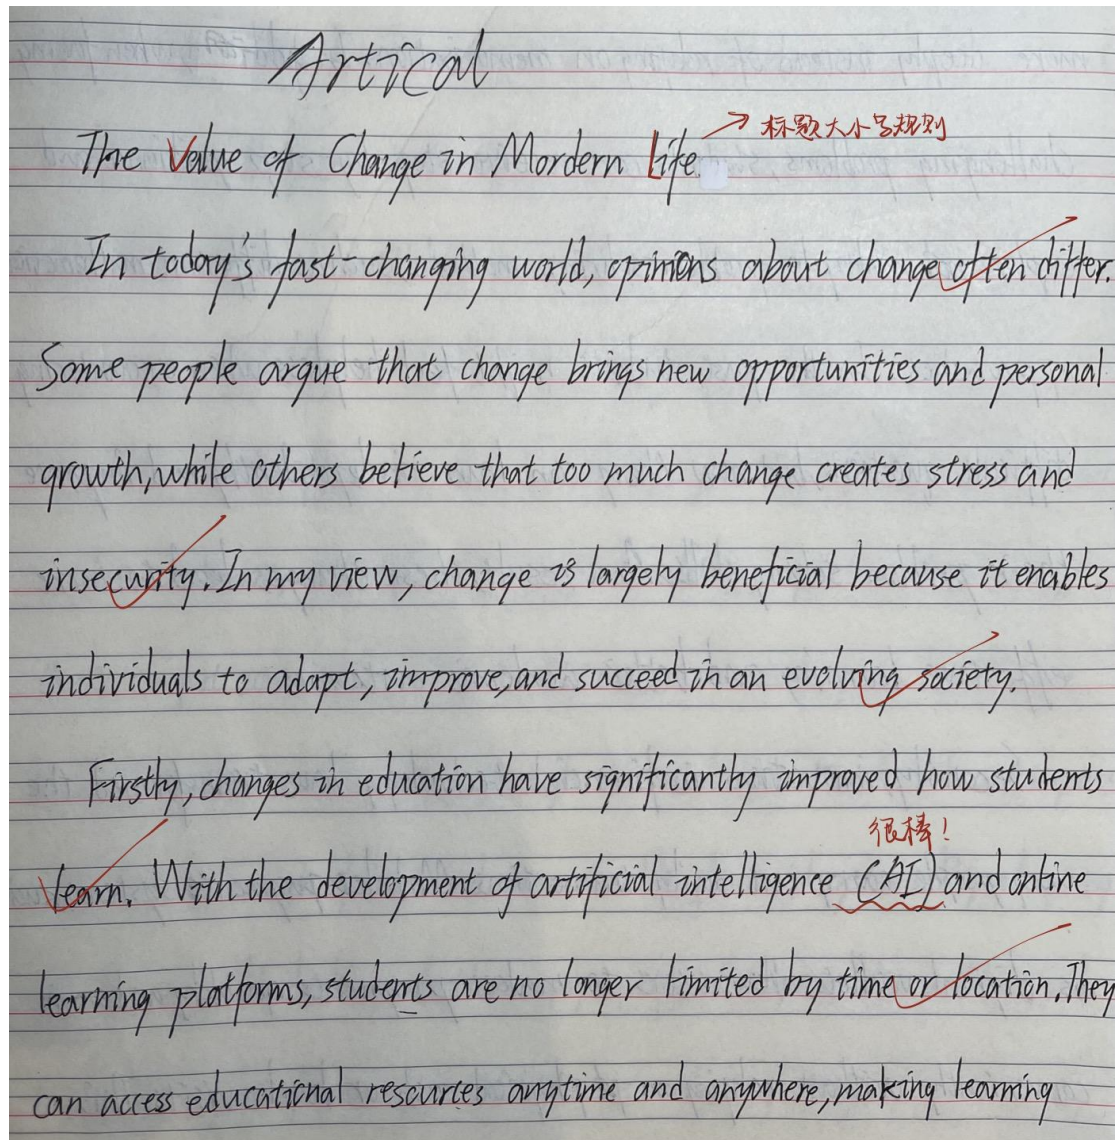

Fake it until you make it. (谚语/流行语)

I try very hard to look effortless. (看起来很自然、很轻松, 其实背后花了很多心思和努力)

offer 神楼 → blessing 中信大厦/中国尊

Homework Analysis

Article

more flexible and efficient. More importantly, AI-powered tools can analyse students' performance and adjust the level of difficulty according to their abilities. This personalised approach helps students understand concepts more deeply instead of relying on memorisation. (In addition, when facing challenging problems, students can receive step-by-step guidance and explore not multiple problem-solving methods), such as different mathematical approaches. In the past, students might feel helpless when encountering difficult questions, but now they can learn independently and improve their problem-solving skills. As a result, these changes lead to more effective learning and better academic outcomes.

→ 需要一个更具体的事件指导。可以用“查看解题方法”指导。

Secondly, innovations in financial technology have transformed the way people carry out daily transactions. Mobile payment systems, such as digital wallets, allow users to make payments quickly and conveniently without relying on physical cash or bank visits. This

reduces transaction costs and removes time constraints. For example, in the past, if someone returned home after a long day and realised there was no electricity credit, they would have to wait until the next day to visit a bank or service centre. Today, with mobile payment applications, they can instantly purchase electricity from their phone and restore power within minutes. ^{> 关于 "today" 的内容可以写得更详细, 这才是重点} This not only saves time but also increases reliability in daily life. Therefore, financial technology improves both efficiency and convenience for individuals and businesses.

In conclusion, although change often requires people to step out of their comfort zones and can initially cause uncertainty, its benefits are clear. It enhances learning through advanced educational tools and improves daily life through faster and more reliable financial systems. By adapting to change, individuals are better equipped to grow, solve problems, and take advantage of new opportunities in modern society.

Title

The value of Change in life

The Value of Change in Life

标题大小写规则 (复习) - Title Case

通常要大写的是:

名词 (book, story) 、动词 (run, make) 、形容词 (beautiful) 、副词 (quickly)、
代词 (You, We 等)

↓↓↓

The value of Change in life

↓↓↓

需要大写的词:

The (在开头 → 一定大写) 、Value (名词) 、Change (名词) 、Life (名词)

↓↓↓

The Value of Change in Life

Body Paragraph 1

In addition, when facing challenging problems, students can receive step-by-step guidance and explore not multiple problem-solving methods, **such as different mathematical approaches.**

In the past, students might feel helpless when encountering difficult questions, but now they can learn independently and improve their problem-solving skills.

In addition, when facing challenging problems, students can receive step-by-step guidance and explore multiple problem-solving methods.

For example, a student revising at home for a maths test may get stuck on a difficult algebra question and not know how to continue. Instead of giving up, the student can use an AI learning platform to receive hints step by step, such as breaking the equation into smaller parts or identifying the correct formula. Gradually, the student is able to solve the problem independently and gains confidence.

这个段落分析写得很好，很有条理，但是没有充足的例子去体现分析的内容。

“different mathematical approaches” 就是一个很好的例子，可以展开写：

AI 如何帮学生解决问题？ AI 怎么根据学生的学习水平调整难度？（体现 personalize)

Body Paragraph 2

Today, with mobile payment applications, they can instantly purchase electricity from their phone and restore power within minutes.

For example, in the past, people often had to wait until the next day to visit a service centre if they ran out of electricity credit.

Today, however, a user can simply open a mobile payment app, select the electricity provider, enter the amount, and complete the payment within seconds. The electricity is restored almost immediately, allowing them to continue their daily activities without interruption.

Forrest 的笔墨都花在“过去”上了，而不是“现在的金融科技”上。

关于“today”就一笔带过了。可以具体说一下现在的系统“怎么运作 + 为什么好”？

Conclusion

很棒!

Text C - Speech

Speech

Hello everyone,

You may wonder why this beach means so much to me. I am Charlie, and today I work for an organisation that protects natural environments.

But long before that, I was just a boy spending endless afternoons here with my mother and my brother, discovering a place that would shape who I am.

Back then, our days were full of energy and curiosity. We would race along the shoreline on our bikes, laughing as the wind and sea spray rushed past us. When the path ended, we didn't stop - we explored.

We climbed over dunes, searched the sand, and turned every visit into an adventure. What I loved most was "treasure hunting." After storms, the beach revealed its secrets: pieces of old wrecks, strange metal objects, even the outline of a buried car. Each discovery felt magical, as if the sea had chosen to share a story just with us. That sense of

excitement and wonder is something I will never forget.

My mother taught me that the beach was more than just a place to play. She showed us that, like life, you have to face challenges with determination—even if things don't go as planned. She also taught us that nature is always changing. The sand shifts, the tides rise and fall, and hidden beneath our feet are traces of the past—remains of people who lived long before us. I learned that this beach carries history, and that many people still don't understand how important it is to protect it.

Those lessons inspired me to do what I do today. I've seen how powerful nature can be, strong enough to move huge objects and how ^{fragile} fragile it is at the same time. I've also seen signs of new life, like a tiny sea creature waiting to hatch, reminding me that the future depends on what we do now. So I'm asking you to help protect ~~this~~ this place. Respect the

rules, avoid ~~de~~ damaging the dunes, and never leave rubbish behind.

We must take responsibility. This beach is not just ours. It belongs to the past, the present, and the future. Let's protect it together.

I am Charlie, and today I work for an organization that protects natural environments.

I am Charlie, and ~~today~~ I work for an organization that protects natural environments.

这里的“today”可以删掉，或者改成“now”。

“I work for ...”就是“当前的状态”（英语里），也就是“我现在在 xxx 工作”。

所以再加一个 today，就会显得多余。

We climb over dunes, search the sand, and turned every visit into an adventure.

We **climbed** over dunes, **searched** the sand, and **turned** every visit into an adventure.

描写过去的事情，用过去式，而且时态要统一。

I've seen how **powful** nature can be, strong enough to move huge objects and how **fagile** it is at the same time.

I've seen how **powerful** nature can be, strong enough to move huge objects and how **fragile** it is at the same time.

拼写错误：

powful → powerful - 批改作业的时候没发现，这里划一下重点

fagile → fragile

This beach is not just ours, it belongs to the past, the present, and the future, let's protect it together.

This beach is not just ours. **It** belongs to the past, the present, and the future. **Let's** protect it together.

This beach is not just ours. → 已经是完整句子，结尾用句号，后面句子开头首字母大写。

It belongs to the past, the present, and the future. → 同上~

关于破折号的使用：

Forrest 在这篇[演讲稿](#)里面有满多地方用了破折号，很棒~ 给人一种演讲者在说话的时候，停一下再强调的感觉，听起来更有力量，也可以达到强化语气或情绪的目的。

但是

在学术写作中，比如 article，不建议用破折号。因为会让文章显得更加口语化，结构比较跳跃，而且主观色彩比较强。

New Writing Task (Text C) - In-class Practising

4

Read **Text C** and then answer **Questions 2(a)–(d)** and **Question 3** on the question paper.

Text C: *The last migration*

This story is set some years in the future. A scientist, Lotta, is involved in a research project studying migratory birds called terns.

I'm watching when the bird is caught. Her wing clips the hair-thin wire, closing the basket gently over her. I approach, not breathing, reluctant to scare her. She ruffles feathers, a small burst of defiance before my fingers close around her. I have to be quick now, deftly looping the band over her leg. The plastic tightens firmly, securing the lightweight tracker. The tracker blinks once, confirming it's working. Her heartbeat pounds fast and fragile inside my palm. I place her back in her nest, edging away. She explodes free, swooping at me suddenly, giving a shrill cry. 5

I grin, thrilled. I've been out here for days, pecked a dozen times, but have now tagged three terns. My tent was blown into the sea last night. My cheap rental car's blessedly warm.

I check my notes again before setting off. Ennis Malone. Captain of the fishing boat *Raven* – in the days when there were fish to catch. 10

That evening, I find Ennis alone in the harbour café – a husk of a man. 'What would you say if I said I could find fish?' I say, opening the tracking software on my laptop and watching his eyebrows arch. The sight of blinking red lights melts me with relief. I'd no idea if this would work, but here they are, the three little birds that will fly south for the winter, taking me with them to learn their secrets. I'm not sure when dreaming of this last desperate project began, but it's part of me now as much as the instinct for breath. It swallowed me whole – a fantasy quest, securing a place on a fishing vessel and having its captain carry me far south following the longest natural migration of any living creature. 15

'I want to follow these birds,' I tell Ennis. 'They're part of the last colony.'

Ennis breathes out heavily, unsurprised. For decades, scientists warned about habitat destruction. Species after species were declared endangered, then extinct. There are no more monkeys in the rainforest, no bears in the once-frozen north, nor any other creature humankind hunted. Some birds remain, but there's no longer any funding for research. 20

'I've put trackers on three, but couldn't afford cameras,' I explain, doggedly following Ennis back to his vessel. 'They'll only help to pinpoint where the birds fly. Someone needs to witness how they survive, to learn. Take me south – we'll follow them. If there are fish left, those birds will find them.' 25

'No,' Ennis insists. 'There's no point.'

I wait all night on the harbour next to his boat. It's almost dawn when Ennis peers at me quizzically from the deck. 'You sure?' 30

I open the map I've made, showing him how the birds set out on separate paths, then merge together, following different routes to the fish. 'The spots vary,' I say. 'But the birds find them.' Wistfully, Ennis traces the lines on the map like memories through the Atlantic.

'Why did you name your boat after a bird, Ennis?' I ask.

'Because she flies too,' he smiles, nodding. 35

Months later, the remote shore ahead is magnificent – but empty. I'd told myself it was over when the signals stopped after the last storm; still somehow I'd hoped to see birds, or something, anything, alive. The boat can go no further, so we continue on foot towards the ridge – the only movement anywhere. My heart breaks and then jumps ... because something just flew across the sky. More somethings appear, swooping and soaring. I scramble to the summit and – oh, hundreds of terns smother an expanse of unspoiled ice below. Yet more dance upon the air. Dipping gracefully, diving hungrily, in a bay bubbling and thrashing with a million scales. Ennis reaches me with a low rumble of laughter, just as a huge whale fin crowns the sparkling surface. We gasp. What else is hiding in these clean, untouched waters – this sanctuary?

40

Reread **Text C**, *The last migration*, in the insert and then answer **Question 3** on this question paper.

Question 3

You are a journalist. You have interviewed Ennis and Lotta months after they have returned from their trip. You write a magazine article about Lotta's research project and the conservation work they are both now involved in.

In your article, you should:

- describe what Lotta did to prepare for the research project **and** the challenges Lotta faced
- explain why Lotta needed Ennis's help with the project **and** why Ennis decided to help Lotta
- explain how Ennis and Lotta felt about what happened on their journey **and** the changes they hope to bring about in the future.

Write the words of the article.

Base your article on what you have read in **Text C**, but be careful to use your own words. Address each of the three bullets.

Write about 250 to 350 words.

Up to 15 marks are available for the content of your answer and up to 10 marks for the quality of your writing.

Questions for Forrest:

Who are “you”? → **Journalist**

Who are you **writing**/speaking to? → **General readers / magazine readers**

用第几人称? → **第三人称 (Lotta / she; Ennis / he);**

风格介于 **article** 和 **story** 之间

! TRY TO USE YOUR OWN WORDS !

Magazine Article:

4 Paragraphs (structure)

Paragraph 1: 开头 (引入背景 + 吸引读者)

Time: months after

Characters: Lotta & Ennis

Topics: research + conservation

真实报道、吸引读者、提供背景

Paragraph 2: Lotta 的准备 + 困难 (完整回答第一个 bullet point)

Preparation

- *tagging birds
- *using tracking devices
- *working alone, planning migration route

Challenges

- *lack of funding
- *harsh weather - tent
- *birds difficult to catch

Paragraph 3: Ennis 的作用 + 为什么决定帮忙 (完整回答第二个 bullet point)

Why Lotta needed Ennis's help

- *only an experienced captain
- *can take her far south
- *access to a fishing vessel

Why Ennis decided to help

*Lotta's determination

*tracking evidence

Paragraph 4: 感受 + 未来 (完整回答第三个 bullet point)

Feelings

Lotta

*belief confirmed

*hope strengthened

Ennis

*wonder restored

*emotional shift

Changes

*protect ecosystems

*raise awareness

*inspire action

Homework 1 - LETTER

完成 P11 ~ 14 的 Magazine Article

Homework 2 - ARTICLE

12

Exercise 6

- 14** In class, you discussed whether plastic products should be limited in daily life.

Here are some comments from your classmates:

Plastic is convenient and cheap.

It causes serious pollution.

There are not enough good alternatives.

We should start with small changes.

Write an article for your school magazine, giving your views.

The comments above may give you some ideas, and you can also use some ideas of your own.

Your article should be between 100 and 150 words long.

You will receive up to 6 marks for the content of your article, and up to 6 marks for the language used.
