Public Transport After Midnight

Public transport is an important part of city life. However, whether it should operate after midnight is widely debated. Some people argue that late-night services are unnecessary due to low demand and high costs, while others believe they are essential for workers and safety. In my view, a balanced approach is most sustainable.

One important advantage of overnight public transport is that it provides essential support for workers who rely on it. Many employees, such as healthcare staff, security personnel, and service workers, often finish their shifts late at night when other transport options are limited or expensive. Without access to public transport, these individuals may face difficulties getting home safely, which could affect their well-being and job performance. In addition, the availability of night services reduces reliance on private transport, which can be

costly and less accessible for lower-income groups. Therefore, maintaining ^{a certain} ~~some~~ level of overnight transport contributes to a more inclusive and safer urban environment.) ^{→ 3 to 4 solution}

However, a significant disadvantage of operating public transport after midnight is the high financial cost ~~involved~~. During late hours, passenger numbers are usually low, meaning that buses and trains often run below capacity. This results in inefficient use of resources, as the cost of fuel, maintenance, and staffing remains high despite reduced demand. Furthermore, governments may need to subsidise these services, placing additional pressure on public budgets. This funding could otherwise be allocated to improving daytime services or other essential sectors such as healthcare and education. As a result, running full-scale transport services overnight may not be economically sustainable in the long term.

In conclusion, although overnight public transport offers clear

social benefits by ~~supporting~~ supporting workers and enhancing safety, it also presents economic challenges due to high costs and low demand. A balanced approach, such as providing limited or reduced services, would allow cities to meet essential needs while maintaining financial efficiency.

整体评价:

*完整回应题目

*语法基本正确，有进步！好棒~

*抄写正确率高，真棒！（有错词，参考下面的笔记）

*整体结构是按照 balance 写的

！但是！

balance 是在结尾段才简单提出“solution”

*题目不是 “problem - solution” 结构，所以不用大篇幅写 “solution”

balance 结构用大白话说:

A: 我同意这个观点!

B: 我不同意这个观点

结局: 我们各让一步，妥协一下，给出折中的办法 (solution)

Text C - Report

REPORT

The purpose of this report is to present my observations on the role of the "Meet and Greet" team at the airport. I will describe the team's current responsibilities, identify problems faced by both staff and passengers, and suggest possible improvements to enhance overall efficiency and service quality. ⇒ A very clear structure!

At present, we are responsible for assisting passengers throughout their journey ^{at} in the airport. Our duties include checking passengers' documents to ensure they are in order before proceeding. We also direct passengers

to the correct areas, such as check-in counters and depart departure gates. In addition, we assist with luggage procedures and provide helpful advice to those who may be unfamiliar with airport processes. Furthermore, we monitor safety by keeping an eye on unattended luggage and responding to any potential issues.

However, there are several challenges in our work. Staff members often have to manage multiple tasks at once, especially during busy periods, which creates significant time pressure. This can lead to tiredness and irritability. From the passengers' perspective, there are ~~are~~ sometimes ^{they may sometimes feel confused} confusion, ~~about~~ ^{about} producers, difficulty handling luggage, and long waiting times. These problems may occasionally result in misunderstandings or conflicts.

In conclusion, to address these issues, duties should be more clearly divided and extra staff added during peak hours. Clearer signs and more support for passengers, especially families ~~and~~ and the elderly, would also improve their

(Paragraph 3)

From the passengers' perspective, there is sometimes confusion about producers, difficulty handling luggage, and long waiting times.

① 从逻辑分析

From the passengers' perspective → 限定视角 (从乘客角度)

they feel ... → 引入主语对象 (passengers)

！ 如果用 there is 结构 ！

会断开前面 “passengers” 这个主语线索

② 拼写错误 (Sorry, 老师批改的时候粗心没看到, **Forrest** 引以为鉴)

producers → Procedures

diffculty → difficulty

(Paragraph 3)

From the passengers' perspective, they may sometimes feel confused about procedures, have difficulty handling luggage, and long waiting time.

New Writing Task (Text C) - In-class Practising

4

Text C: *The Mars expedition*

Bob, Rajah and Sarah belong to a team of astronauts who have landed on Mars. Their Captain has sent them out on the first ever Martian mission to look for signs of life. They are driving in a rover: a motor vehicle designed to travel on Mars's surface.

Bob stopped the rover, and Rajah and Sarah climbed out, Sarah carrying the shovel. Bob had decided to remain in the rover to receive communications from the Captain at the base some twenty kilometres back. Bob would also be testing any samples Sarah and Rajah brought to the rover.

This was the last site they would be visiting and then they would be finished. Bob was relieved about that. After putting Bob in charge of today's mission, the Captain had spoken to Sarah and Rajah about working together as a team and, apparently, they had assured her that they would. But their constant arguments today told another story: it was not supposed to be a competition to go down in history as the individual who first found life on Mars.

5

Bob did chuckle to himself, though, as he remembered their spacecraft landing two days earlier and how both Sarah and Rajah had jumped from the door, arms outstretched to prevent anyone else passing them, each shouting something rather grandly foolish for the benefit of posterity. They'd ended up in an undignified heap together on Mars's surface, while Bob and the other astronauts had ambled over and past them to inspect the base that the rover had built.

10

15

That base, along with the spacecraft, would be their home now for another three months. It was pretty basic living but sufficed if they gave each other space. Most of the other astronauts were respectful and professional which certainly helped.

Suddenly, the communication device sounded in the rover: it was Rajah.

'I'm about to hit water!' cried Rajah.

20

'Ridiculous. You've barely broken the ground surface!' Sarah's pained voice pierced Bob's ears.

Bob decided to leave the rover. He saw the two silhouetted figures ahead of him, apparently engaged in a struggle over a shovel.

Bob detached his own shovel from the side of the rover and walked in another direction. The ground was promisingly soft here. His booted foot sank the shovel blade through a surface layer of fine crimson crumbs. An unmistakably damp wedge of soil was removed, and clear liquid slipped gently into its place.

25

'Incredible!' exclaimed Bob. 'Rajah, Sarah, can one of you get a canister out of the rover and come over here?'

30

Sitting in the rover a minute later, the astronauts watched as Bob emptied the liquid from the canister into the testing receptacle. Bob felt his heart pound as he looked at the results. 'OK, Rajah, Sarah, the readings are positive: biological organisms are present. I'm going to prepare a slide and put some of this liquid under the microscope to see if I can view them.'

Seconds passed like hours as Rajah and Sarah hung over Bob's shoulder, both closely observing him place the slide under the intense scrutiny of the microscope's eye. Silence entered the cramped space of the rover and floated inquisitively around the three absorbed figures. Bob inhaled sharply as a clear image on the slide came into view. In front of him gyrated a dozen tiny worm-shaped life forms. Their movements were subtle and deliberate, as if choreographed.

35

40

Rajah and Sarah both sprang simultaneously into action, grabbing the communication device that would connect them to the base.

'Captain, this is big!' yelled Sarah.

'I have just found the first ever evidence of life on Mars!' hollered Rajah.

Bob realised that the many years he had trained for this expedition had been merely a poor rehearsal for this one rapturous moment. He silently contemplated the enormity of the discovery. Meanwhile, Sarah began a frenzy of 'selfie' live-streaming, parading the microscope like a glorious trophy. Rajah emailed a solemnly worded message, delineating the grandeur of his achievement. He urged the Captain to upload this immediately to their captive audience of leaders, scientists and well-wishers on Earth.

45

50

'Oh!' Rajah said, a minute later. He looked crestfallen. 'The Captain only wants to speak to you, Bob!'

Reread Text C, The Mars expedition, in the insert and then answer Question 3 on this question paper.

Question 3

You are the Captain. After speaking to Bob about the mission of today, you write a journal entry about the progress of the Mars expedition so far.

In your journal entry, you should:

- describe what the mission today involved and your feelings about how it has gone
- describe your thoughts and feelings about your team of astronauts and the working and living arrangements on Mars
- explain what you did after you received the news of today and what your hopes are for the rest of the time you spend on Mars.

Write the words of the journal entry.

Base your journal entry on what you have read in Text C, but be careful to use your own words. Address each of the three bullet points.

Write about 250 to 350 words.

Up to 15 marks are available for the content of your answer and up to 10 marks for the quality of your writing.

Questions for Forrest:

Who are "you"? → **the Captain**

Who are you **writing**/speaking to? → **Captain 本人**

用第几人称? → **First + third person**

! TRY TO USE YOUR OWN WORDS !

Journal Entry:

4 Paragraphs (structure)

Paragraph 1: 开头 (交代 Journal Entry 主要内容 + 背景)

The purpose of the Journal Entry + what is it about:

*Simple background (1 sentence)

final mission / last site / search for life

*What happened today?

team went out

conflict between Rajah & Sarah

Bob worked separately

discovery of water + life (Bob)

Paragraph 2: 今天任务 + 感受 (完整回答第一个 bullet point)

What to include (from the text):

*The team visited the final site

*Bob stayed in the rover / Rajah and Sarah went out

*There was arguing and competition (Rajah and Sarah)

*Bob later worked alone and discovered: water → evidence of life

Your feelings (VERY important):

- At first: concerned / cautious

- During: frustrated or disappointed (because of arguments)

- At the end: amazed / proud / relieved

Paragraph 3: 对团队 & 火星生活的看法 (完整回答第二个 bullet point)

About the team:

Bob → calm, focused, professional, reliable

Rajah & Sarah → competitive, distracted by fame, not working well as a team

About life on Mars:

* living conditions are basic

* space is limited

*but manageable if people cooperate

Paragraph 4: 听到消息后做了什么 + 未来希望 (完整回答第三个 bullet point)

What you did:

* you contacted Bob directly (Explain why you chose Bob!)

* you asked for confirmation of the results

Your hopes:

* further investigation of life on Mars

* improved teamwork

* improving living condition

Homework 1 - LETTER

完成 P8~11 的 Article

Homework 2 - ARTICLE

Exercise 6

- 14 Some people believe that companies should hire people with disabilities, while others think it may not be practical. Discuss both views and give your own opinion.

Here are some comments from your classmates:

Everyone should have equal job opportunities.

It may increase costs for companies.

People with disabilities can be very talented.

Workplaces may need special facilities.

Write an article for your school magazine, giving your views.

The comments above may give you some ideas, and you can also use some ideas of your own.

Your article should be between 100 and 150 words long.

You will receive up to 6 marks for the content of your article, and up to 6 marks for the language used.

Paragraph 1

Background: ...

People's opinions (two perspectives)

This article will discuss both views on hiring people with disabilities and explain my own opinion. or → This article will discuss the advantages and disadvantages of hiring people with disabilities and explain why I believe it is not practical. (Forrest 观点)

Paragraph 2

Reasons for hiring people with disabilities

Paragraph 3

Reasons why companies may not hire people with disabilities

Paragraph 4

Your opinion: I do not agree, and explain my reasons (conclusion)
