Carry-on luggage/baggage/suitcase 随身行李

Homework Analysis

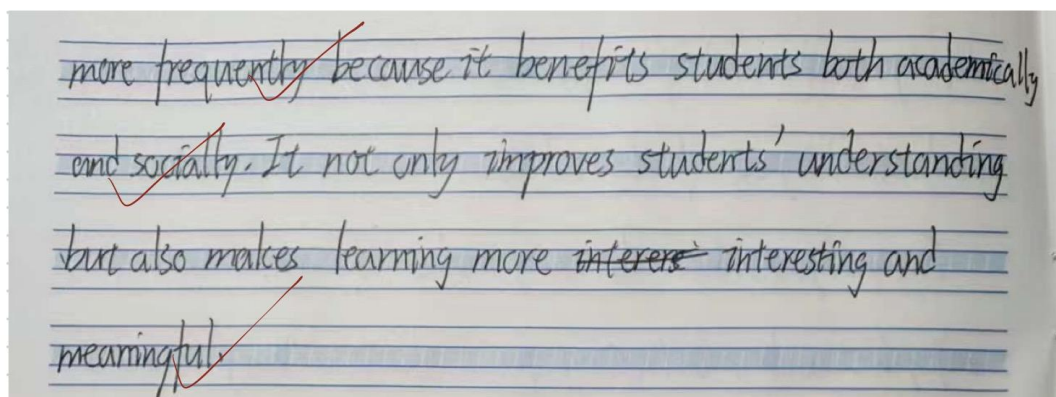

Article

Outdoor Learning is ~~at~~ More Beneficial for Students.
^{educators} ^{→ 晋杨来谈. 学校本身不会讨论.}
Nowadays, many schools are discussing whether students should learn outside the classroom more often, such as in museums or historical places. ^{sites} Some people support this idea, while others believe traditional classroom learning is better.
In my opinion, outdoor learning is more beneficial for students.
Firstly, students can understand concepts more effectively through real experiences. In classrooms, students usually learn from textbooks and slides, which ~~is~~ can make ~~a~~ some concepts difficult to imagine clearly. However, ~~visitors~~ visiting museums or historical places allows students to see real objects and examples. For instance, students who study science can observe experiments in the museum instead ~~to~~ of only reading about them in test text. ^{which brings theories to life} As a result, students are more

likely to remember information and develop a deeper understanding of the subject.

Secondly, outdoor learning makes education more enjoyable and motivating for students. Many students become less interested in ~~the~~ learning when they stay in the same classroom every day. ^{学习} in different environments can increase students' interest and encourage them to participate actively in lessons. ^{→ 我们也有例子，但和BP1相似} (For example, students who visit a science museum or nature park can learn scientific concepts through real-life observation and experiments, which makes the lesson more exciting and memorable.) Furthermore, outdoor activities ~~also~~ improves communication and teamwork skills because students often work together during trips and projects. ^{→ BP25以网络链接展示！}

In conclusion, schools should encourage outdoor learning.

Introduction

Nowadays, many schools are discussing whether students should learn outside the classroom more often, such as in museums or historical places.

Nowadays, many educators/teachers are discussing whether students should learn outside the classroom more often, such as in museums or historical sites.

① historical places -> historical sites (更地道)

② schools -> educators/teachers (上次批改没提出来的点)

严格来说:

学校本身不会讨论。而是在学校工作的人或者从事教育的人在讨论

Body Paragraph 1

For instance, students who study science can observe experiments in the museum instead of only reading about them in text.

For instance, students who study science can observe experiments in the museum instead of only reading about them in text, which brings theories to life.

加上 “which brings theories to life” 可以简单说明: 为什么观察实验有帮助

不过, 其实实验一般是在 lab 里面观察啦! 所以, 可以严谨点:

For instance, students visiting a science museum can observe interactive demonstrations instead of merely reading about scientific theories in textbooks, which brings those theories to life.

Body Paragraph 2

Many students become less interested in learning in different environments can increase student's interest and encourage them to participate actively in lessons.

Many students become less interested in learning when they stay in the same classroom every day. Learning in different environments can increase student's interest and encourage them to participate actively in lessons.

这两句话没抄完整呀!

只看句子的话，原文也是有语法错误的。

原文包含了两个句子：

① Many students become less interested in learning.

② Learning in different environments can increase students' interest and encourage them to participate actively in lessons.

****不够认真，两个 learning 看串了****

For example, students who visit a science museum or nature park can learn scientific concepts through real-life observation and experiments, which makes the lesson more exciting and memorable.

Rewrite:

Part of the HW

虽然论点 2 和论点 1 不同，但是这个例子其实和 BP1 的很类似。

下文 Further more 的内容就很好！整个段落其实可以用 Further more 的内容作为核心论点。这样不仅内容很新颖，而且能最大程度地减少和 BP1 重复。

Furthermore, outdoor activities improve communication and teamwork skills because students often work together during trips and projects.

“Furthermore”的内容属于“分析”，而不是“例子”

段落结构：论点 -> 分析 -> 例子 -> 总结

如果保留“furthermore”的内容，建议卸载“for example”之前

例子的内容则包含以上分析的内容

重新分析和构思 Body Paragraph:

Forrest 原文:

Body Paragraph 1: Real experiences improve understanding

Body Paragraph 2: Outdoor learning is more interesting

核心逻辑都是: Museum -> Learn better -> More interesting/less boring

!!!BUT!!!

如果论点换成: Outdoor learning develops communication and teamwork skills.

就很不一样了! 除了减少重复外, 还和 Body paragraph1 (academic benefits) 是完全不一样的纬度: personal development / social development

这也是 Forrest 在写很多其他 topic 的作文, 可以用的写作角度

Example (for reference only):

Conclusion

Good Job!

Text C - Journal Entry

Good afternoon everyone, ^{and thank you for inviting me here today.} My name is Stig Hansen, and I am the Head Keeper at Aurora Park in ~~the~~ northern Norway. Today, I would like to tell you about my work with wolves, what visitors experience at our park, and why our work is important for both animals and people.

My job involves guiding visitors safely into the wolf enclosure and helping them understand these amazing creatures. I also monitor the wolves carefully, study their behaviour, and make ^{sure} they stay ^{healthy} and calm.

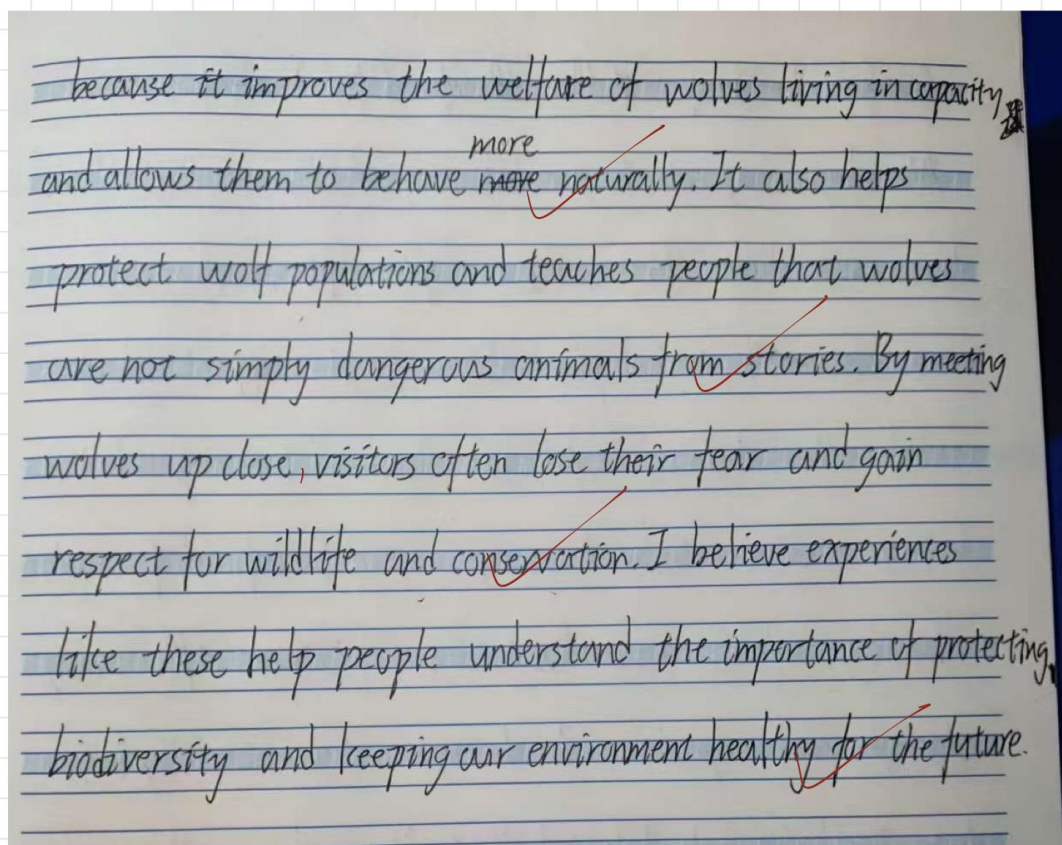

Working here is not easy because we often face freezing Arctic weather. To do this job well, I need patience, confidence, and a deep knowledge of wolf behaviour.

It is also important to stay calm in emergencies and

communicate clearly with visitors. Above all, I must respect nature and the animals in my care.

Many visitors enjoy meeting wolves face to face because it gives them a rare ~~chance~~ chance to feel close to nature. They love hearing the wolves howl, watching them run and interact, and sometimes even seeing the beautiful Northern Lights above the snowy valley. However, safety is always our first priority. The park is surrounded by tall fences with electric wires, and visitors use a protected tunnel to enter the lodge safely. We also have strict rules. ^{→ We also have strict safety rules to minimise risks.} For example, people under eighteen are not allowed to enter the enclosure, and trained keepers supervise every interaction with the wolves.

The work we do at Aurora Park is important

Paragraph 1

Good afternoon everyone.

Good afternoon everyone, and thank you for inviting me here today.

原文是很标准的 speech opening (棒~)

但是题目写了 "You have been invited to give a talk."

所以回应一下题目

Paragraph 2

I also monitor the wolves carefully, study their behaviour, and make they stay health and calm.

I also monitor the wolves carefully, study their behaviour, and make sure they stay healthy and calm.

① make sure 抄错

② stay + 形容词 -> 保持某种状态

*health 是名词呀!

Paragraph 3

We also have strict rules.

We also have strict safety rules to
minimize risks.

原文太简单了。而且下一句的“for example”没有说为什么不给 18 岁以下的人进去

可以展开说说 rules 的目的、作用等。

New Writing Task (Text C) - In-class Practising

Read **Text C**, and then answer **Questions 2(a)–(d)** and **Question 3** on the question paper.

Text C: Paddling Alaska

The writer, Audrey Sutherland, worked for years as a careers adviser for high school students before setting off on her first solo kayaking trip through Alaska. Since that first trip she has paddled more than 13 000 solo Alaskan kilometres.

I first saw southern Alaska from the air, looking down on islands with secluded beaches and hidden inlets, huge trees and a point for watching sunrise and sunset.

Fifteen kilometres from any town was wilderness; towns were dotted far apart. That left lots of space to paddle, explore and camp. Since 1967, whenever I could squeeze in a vacation, I'd been voyaging in inflatable kayaks. I'd written a fairly successful book about my trips around Hawaiian islands. Paddling through Alaska was top of my 25-morale-building-things-to-do list. My publisher was also keen.

5

Looking at the map, my choice was clear: I could paddle direct along established routes for fishing boats, or go 'gunkholing', as boaters say, prowling in and out of tiny coves and meandering south. Connecting a roundabout route of hot springs, old cabins, the smallest islets and resupply towns, I could trace excerpts of historic voyages, forage natural delicacies and communicate with such endearing animals as whales and otters. I wasn't yet factoring in grizzly bears.

10

This second route would be over 800 miles and involve crossing open sea and dangerous straits. Obviously, I'd go gunkholing.

15

My inflatable kayak would be the smallest boat to attempt this distance, an impertinent toy compared to the crafted cedar-log-dugout canoes paddled for centuries along these misty shores, or sturdy modern fibreglass canoes.

'You're seriously paddling 800 miles in Alaska in that?' said a man on a beach one day. 'Where's the unicorn head and mermaid flippers to go with it?'

20

He sneered at the limp, shapeless roll of plastic on the sand. I attached the hose of the air pump to a valve in the newly patched intrepid vessel and the plastic kayak squirmed slowly and reluctantly out of its wrinkles into a tube shape. I kept pumping. The second side and the hull gradually assumed a wonky banana shape, a bit like a boat-shaped doughnut, bright yellow with ridiculously optimistic red-and-white 'racing stripes' down the sides.

25

Why use this boat? Well, I already owned it. It would roll up in a small bag that I could take on the plane. I'd paddled enough rough seas in it to know it was seaworthy. Above all, it was light enough to carry by myself up the beach above high tide each night.

My yellow colour scheme was reinforced when my order of foul-weather gear arrived. I tried it on, laughing at my incongruous image in the mirror. 'Getting older aren't you?'

30

I'd asked for two months off work to complete the trip. I wanted to be lean, hard and kind. Instead I felt soft, fat and mean. Years of a desk job can do that. After decades spent helping others decide what to do with their lives, I wondered whether I knew what to do with mine.

35

During the next weeks I booked cabins where I could stay for 10 of the 80 nights of the trip. I mailed my camping essentials to excited friends living near my launching point, and sent resupply boxes of dried food addressed to myself at post offices en route, with notes to the incredulous post masters to 'hold for paddling expedition to arrive approx. (date)'. I dutifully made copies of the daily route so my grown-up family would know where to start their search if I didn't check in along the way and made notches on one side of my pencil to measure a nautical mile on some of the ocean charts.

40

My request for leave came back, unapproved.

I resigned.

And the bear? Well that was actually years later. Beginning this first Alaskan adventure, I'd have been relieved to know that any bears and I would avoid each other. Every Alaskan has a bear story. Should I start with mine? 'The grizzly bear stood one metre away, his enormous muzzle visible through the plastic sheet over the cabin window ...' Nah, I'll tell you about that later.

45

Re-read **Text C, *Paddling Alaska***, in the insert and then answer **Question 3** on this question paper.

Question 3

You are a journalist writing for a teenage magazine some years after the events described in the text. You decide to write a feature article about Audrey Sutherland and her first attempt to paddle Alaska.

In your article you should explain:

- the opinions and reactions of other people to Audrey's plan to paddle Alaska for the first time **and** what was remarkable about the journey
- the preparations she made for this first Alaskan journey **and** why these preparations were necessary
- why she wanted to paddle Alaska **and** the rewards of the trip.

Write the words of the article.

Base your article on what you have read in **Text C**, but be careful to use your own words. Address each of the three bullets.

Write about 250 to 350 words.

Up to 15 marks are available for the content of your answer, and up to 10 marks for the quality of your writing.

Questions for Forrest:

Who are "you"? → **Journalist**

Who are you writing/speaking to? → **teenagers**

用第几人称? → Third Person -> **She**

! TRY TO USE YOUR OWN WORDS !

Talk:

4 Paragraphs (structure)

Paragraph 1: introduction - 简单介绍 Audrey 和这次探险

What to include:

- *Audrey Sutherland was a careers adviser.
- *She decided to make her first solo kayaking expedition in Alaska.
- *The journey later became famous because of its scale and difficulty.
- *It showed her determination and adventurous spirit.

Paragraph 2: 别人对 Audrey 计划的看法 + 这趟旅程为什么特别 (完整回答第一个 bullet point)

Other people's reactions

<i>Publisher</i>	<i>Man on the beach</i>
*supported her idea	*thought the kayak looked
*was enthusiastic about the trip	ridiculous
	*doubted it could survive such a
<i>Friends</i>	journey
*excited about her expedition	*mocked her plan
*helped by receiving her equipment	*compared the kayak to a toy

Postmasters

- *surprised that someone would attempt such a trip
- *asked to hold food supplies for her

What was remarkable about the journey

- *over 800 miles long
- *completed alone
- *crossed open sea and dangerous straits
- *travelled through remote wilderness
- *used a small inflatable kayak
- *followed a less direct route to explore hidden places
- *visited hot springs, cabins and tiny islands
- *encountered wildlife such as whales and otters

Paragraph 3: 她做了什么准备 + 为什么这些准备重要 (完整回答第二个 bullet point)

Preparations:

- *arranged two months away from work
- *booked cabins for some nights
- *ordered foul-weather clothing
- *repaired and tested her kayak
- *organized camping equipment
- *mailed supplies ahead to post offices
- *planned daily routes

Why necessary:

- *journey was long and isolated
- *few towns available for supplies
- *weather could be severe
- *needed shelter during parts of trip
- *family could locate her if she disappeared
- *required food resupplies along the route
- *navigation was essential in remote

*copied maps and route information	coastal areas
*prepared navigation charts	*safety was a major concern
*informed family of her plans	

Paragraph 4: 为什么想去阿拉斯加 + 这次旅行带来的收获 (完整回答第三个 bullet point)

Why she wanted to go:

- *fascinated by Alaska's scenery
- *attracted by its wilderness and open space
- *wanted adventure and exploration
- *had previous kayaking experience
- *wanted to follow historic routes
- *hoped to experience nature closely
- *wanted a personal challenge
- *hoped to improve herself physically and mentally
- *felt dissatisfied with years of office work

Rewards of the trip:

Physical rewards

- *became stronger and more independent
- tested her endurance

Emotional rewards

- *regained confidence
- *discovered what she wanted from life
- *escaped routine work

Experiences gained

- *explored remote locations
- *saw wildlife
- *collected natural foods
- *enjoyed freedom and solitude

*created memories that later
inspired further Alaskan journeys

Homework 1 - LETTER

完成 P11~16 的 Article

Homework 2 - ARTICLE

Exercise 6

- 14** In class, you discussed whether companies should give priority to local people when hiring employees.

Here are some comments from your classmates:

Local workers understand the community better.

Skills are more important than nationality.

Governments should protect local jobs.

International workers bring new perspectives.

Write an article for your school magazine, giving your views.

The comments above may give you some ideas, and you can also use some ideas of your own.

Your article should be between 100 and 150 words long.

You will receive up to 6 marks for the content of your article, and up to 6 marks for the language used.

Homework 2 - Rewrite Body Paragraph 2

Using this point: Outdoor learning develops communication and teamwork skills.
