Tutor's Comments

Qingchuan is a humble member of Thoburn House. He has participated in all of the inter-house sports competitions this year. He should continue with this enthusiasm and take on the next year with the same passion and energy. Qingchuan exhibited some behavioral concerns earlier this year. However, he has since shown significant maturation and improvement in his conduct. Qingchuan is encouraged to mingle more with his classmates of different backgrounds and widen his social circle to fully enjoy the international environment of the school.

Subject: Art

Art <i>Miss C S W Ang</i>	Term 1			Term 2			Term 3			Term 4			Overall	
	SA	AL	CW	SA	AL	CW	SA	AL	CW	SA	AL	CW	Subject Ach	Year End
	4	5	6	4	5	5	4	4	6	-	5	5	4	-

Curriculum for Year

This year, the students explored a variety of techniques in art. They started with an intensive drawing project leading to an architecture assignment. Students were challenged to design a recreational space outside the school library. In terms 2 and 3, they learned how to brainstorm, research architects, articulate their opinions on structures, develop designs based on a specific location, work in teams, sketch their ideas, and construct architectural models. In terms 3 and 4, they studied basic colour theory and learned how to apply acrylic painting techniques on paper. They also created cubism-style paintings and explored the fundamental principles of design by arranging and organising visual elements, and text to create poster designs.

Achievements

Qingchuan is a cheerful student who responds appropriately when corrected. In the Cubism painting assignment, he showed limited painting skills, and as a result, the subjects' shapes were painted unevenly, displaying some brush strokes. As for the Principles of Design assignments, he used a graphic design tool to create a poster that was simple and lacked focus.

Targets for Development

Qingchuan has to practise more on his painting techniques which he needs to paint the subject's contour evenly and cleanly. He also needs to mix the colours and blend them well to paint them smoothly on paper. As an alternative, he may study the technique of renowned painter Pablo Picasso, who used harmonic colours scheme to produce artwork that was well-balanced. To improve the composition of his poster design, he can use framing by incorporating images in the foreground to frame the subject, drawing attention and adding depth to the design.

Subject: Drama

Drama <i>Ms E Sia</i>	Term 1			Term 2			Term 3			Term 4			Overall	
	SA	AL	CW	SA	AL	CW	SA	AL	CW	SA	AL	CW	Subject Ach	Year End
	4	5	5	4	4	5	5	6	5	-	5	5	5	-

Curriculum for Year

The Year 1 Drama curriculum focuses on foundational performance skills, including vocal projection, tone, facial expression, body language, stage directions, and memorising lines. Students will build vocal strength and clarity through projection exercises and explore tone variations to convey emotions and character. Through mirroring and character warm-ups, students will develop expressive facial gestures and use body language to communicate intention. They'll learn stage directions and practise blocking for spatial awareness on stage. Techniques for memorising lines are reinforced with peer rehearsals, focusing on timing and cue coordination. Finally, students apply these skills in short performances, receiving peer feedback to refine their expressive abilities.

Achievements

Qingchuan has shown progress in vocal projection and is starting to experiment with vocal tone. He follows stage directions well and is making steady improvements in his characterisation. Qingchuan learns his lines efficiently and has a positive attitude in class.

Targets for Development

To reach the next level, Qingchuan should focus on deepening his emotional connection with his characters. By adding more nuance to his vocal tone and experiment with more complex character choices, It will enhance his overall performances on stage.

Subject: English

English <i>Mr J Cope</i>	Term 1			Term 2			Term 3			Term 4			Overall	
	SA	AL	CW	SA	AL	CW	SA	AL	CW	SA	AL	CW	Subject Ach	Year End
	4	4	4	3	4	4	5	5	5	-	5	5	4	5

Curriculum for Year

Literature was studied throughout the year in Year 1 Bridging. This included poetry, short stories and a novel. The literary elements of character, setting, plot, tone, mood and theme were analysed. We also learned and applied in writing the text types of an informal letter, an argumentative article, a poster, a summary, diary entries, book reviews and instruction writing. Listening skills and reading comprehension skills were developed in weekly tasks. Students were taught Cornet note-taking skills and research skills using Google Apps. When our lessons went online during home based learning we relied heavily on Google Apps for instruction and coursework. Students were taught how to use and apply Google Classroom, Documents, Sites, Forms, Sheets and Meet. They were expected to maintain an organised digital learner portfolio which they linked all their work to. Students should transfer these skills next year in Year 2.

Achievements

Ma Qingchuan has experienced a developing year, and in Term 4, he was able to achieve a score of 3 in his exams. This result reflects his ongoing journey to find consistency in his skills. In listening, he often performs well in class; however, there are occasions during exams when he does not quite meet his expectations. This inconsistency suggests that he could benefit from targeted practise to enhance his listening comprehension in test scenarios. In writing, Qingchuan is capable of completing simple emails, but he needs to focus on adding more detail and content elements to his responses to enrich his writing. On a positive note, Qingchuan is doing well in reading; he demonstrates the ability to read longer texts and successfully locate specific information, which is essential for his overall academic progress. Additionally, we have seen considerable improvement in his concentration during group work in Term 4, which is very promising. I am encouraged by this progress and eager to see it continue as he transitions into the next academic year.

Targets for Development

To further support his development, Qingchuan should focus on consistent practise in listening exercises that mimic exam conditions, which will help improve his performance. In writing, he should work on expanding his responses by incorporating more details and examples. Engaging with diverse reading materials will continue to enhance his comprehension skills and support his ability to summarise effectively. By addressing these areas, Ma Qingchuan will be well-prepared for the transition to the IGCSE programme and continue to advance his English language skills.

Subject: Geography

Geography <i>Ms G H Kirby</i>	Term 1			Term 2			Term 3			Term 4			Overall	
	SA	AL	CW	SA	AL	CW	SA	AL	CW	SA	AL	CW	Subject Ach	Year End
	5	7	7	5	5	5	5	4	3	-	5	5	5	6

Curriculum for Year

1BU Students in Geography developed map reading skills by learning how three-dimensional landscapes can be represented in two dimensions through topographical maps. They also understood the importance of natural resources for the survival of mankind. They studied Ecosystems and how they are being changed by Man along with the climate. They also explored how to describe trends, graphs, and diagrams. The students did projects on weather instruments, Ecosystems and revision notes in the form of videos and exercises. They have also developed transferable skills, including PEE paragraphing, the benefits of group collaboration, reflection and presentation skills.

Achievements

Qingchuan has been gradually improving in Geography this year. His group work and ability to work with others has improved, as have his presentation and examination skills. Qingchuan has been generally more focused but still needs to work on this. He has a basic understanding of the concepts taught.

Targets for Development

Qingchuan needs to work on contributing more to group and whole class discussions. He needs to work on his group collaboration skills and try taking the leadership of a group. Qingchuan would benefit from asking more questions in class and working on his vocabulary. He should be careful to not allow others to distract him or be distracting. He also needs to work on his exam skills.

Subject: Global Perspectives

Global Perspectives <i>Ms G H Kirby</i>	Term 1			Term 2			Term 3			Term 4			Overall	
	SA	AL	CW	SA	AL	CW	SA	AL	CW	SA	AL	CW	Subject Ach	Year End
	6	7	7	6	7	7	5	5	5	-	5	4	4	-

Curriculum for Year

Students in the year 1 Global Perspectives curriculum have completed projects in the topics of 'Education for All', 'Poverty and Inequality', 'Sustainability' and 'Migration'. They have learned to evaluate sources, considering the author and purpose, recognising that some sources may be bias, recommend an appropriate course of action and explain possible consequences for a national or global issue. They have learned listen to ideas and information and offer relevant and well-judged contributions that demonstrate understanding of an issue. They also learned to identify and begin to reference a range of print and multimedia sources and use them to locate relevant information and answer research questions. They have been practised identifying and evaluating sources of information for reliability and bias. They have been taught to reflect on benefits and challenges of teamwork to personal experience of working together to achieve a shared outcome and identify targets for improvement.

Achievements

Qingchuan is able to communicate well in a group and has the confidence in class to not be afraid of getting involved during group discussions and activities. His presentation skills have been improving and he has handed in his work although it is usually rushed and often in note form rather than PEE.

Targets for Development

Qingchuan is able to communicate well in a group but needs to try to improve his participation in whole class discussions and activities. He should try to extend his knowledge by asking more questions about the work in lessons and reading more about current events. Qingchuan needs to take care to stay focused in class and not be distracted or distracting. He also needs to make sure he hands in all his assignments and does them to the required standard.

Subject: Mathematics

Mathematics <i>Mr C Foo</i>	Term 1			Term 2			Term 3			Term 4			Overall	
	SA	AL	CW	SA	AL	CW	SA	AL	CW	SA	AL	CW	Subject Ach	Year End
	7	7	7	6	5	6	7	6	7	-	7	7	7	7

Curriculum for Year

The students have completed their syllabus, covering the topics of Number Types, HCF, LCM, Estimation, Basic Algebra and Algebraic Manipulation, Linear Equations, Graphs of Linear Functions, Ratio and Proportion, Speed, Distance and Time, Percentage, Simple and Compound Interest, Angles and angle properties, Unit Conversions, Properties of Triangles, Quadrilaterals and Polygons, Arcs and Sectors, Mensuration, Pictograms, Bar graphs and Pie charts.

They have also been prepared sufficiently to take the end of year examination with proficient use of the scientific calculator.

Achievements

Qingchuan demonstrates a thorough knowledge and understanding of the syllabus. He successfully applies mathematical principles at a sophisticated level throughout a wide variety of contexts; uses problem solving techniques in challenging situations; recognizes patterns and structures, and competently reasons the significance of results. He also communicates mathematics clearly and effectively; demonstrates the ability to integrate knowledge, understanding and skills from different areas. He uses technology proficiently.

Targets for Development

Qingchuan has done exceptionally well this year and has shown himself to be a hard-working, focused and engaging student. He should be commended for his excellent end of year results and attitude in class. I would encourage him to maintain his work ethic and continue to practise higher order thinking questions in order to help him achieve his full potential.

End-Of-the-Year Report 2024

Subject: Music

Music <i>Dr P C W Tan</i>	Term 1			Term 2			Term 3			Term 4			Overall	
	SA	AL	CW	SA	AL	CW	SA	AL	CW	SA	AL	CW	Subject Ach	Year End
	6	6	6	5	6	6	5	5	4	-	4	4	4	-

Curriculum for Year

This year, we celebrated the joy of music-making by welcoming new students and immersing them in the school culture through a collaborative project that combines music with other art forms, utilising creative problem-solving skills. In Term 2, students gained foundational knowledge in music theory and aural skills during their music lessons, which they then applied to instrumental studies with a focus on guitar in Term 3. We invited external instructors to provide specialised guitar lessons, enriching their instrumental learning experience. By Term 4, as we prepared students for the IGCSE Music elective in Year 3, they delved into music analysis, expanding their repertoire of musical terminology to include concepts such as instrumentation, melody, harmony, dynamics, phrasing, articulation, and structure.

Achievements

Qingchuan has the potential to do better. He needs encouragement and supervision to get things done. For the final music analysis assignment, Qingchuan provides basic analysis, though lacks depth or critical engagement. The information presented uses limited sources. Infographic is somewhat disorganised or difficult to read. Perhaps Qingchuan can consider more listening examples to support the findings. With further development in depth of analysis, the presentation could become even more compelling and insightful.

Targets for Development

Qingchuan is encouraged to listen to music of various genres so that the musical terms can be discussed more freely. Perhaps by attending concerts of both classical and contemporary music, it may expand and enhance the musical observations more naturally.

End-Of-the-Year Report 2024

Tutor Group: 1-THO
Subject: Physical Education

Physical Education <i>Miss E Dent</i>	Term 1			Term 2			Term 3			Term 4			Overall	
	SA	AL	CW	SA	AL	CW	SA	AL	CW	SA	AL	CW	Subject Ach	Year End
	5	6	-	5	5	-	5	5	-	-	6	-	6	

Curriculum for Year

Physical Education is compulsory for all students in Years 1-4. In Year 1 pupils are able to learn and develop physical activity skills and social and interpersonal skills of the IB learner profile; with a particular focus on developing core skills, knowledge, communication and being caring and principled (sportsmanship). A range of games activities such as Netball/ Basketball, Football, Rugby/Touch, Badminton/Tennis, Volleyball and Striking and Fielding games are learnt, together with aesthetic activities such as gymnastics.

Achievements

Qingchuan has made very good progress in PE lessons this year, where he has consistently worked with effort throughout all the units studied. Qingchuan has continued to show an ability to use basic skills with consistency and to advance these core skills in some activities, such as in the rounders unit. Qingchuan is able to answer questions on and demonstrate knowledge of, the rules and scoring systems of a variety of sports. his knowledge and understanding was particularly to a high standard in the netball unit.

Targets for Development

Qingchuan should continue to practise the basic skills and start to experiment with more advanced skills. Qingchuan should also attempt to analyse his own performance and thinks of ways to improve. Next year Qingchuan should consider how to use skills in the correct situation, selecting and applying the correct tactics.

End-Of-the-Year Report 2024

Subject Teacher's Report

Name: Ma Qingchuan
Tutor Group: 1-THO
Subject: Science

Science <i>Ms S Sareena</i>	Term 1			Term 2			Term 3			Term 4			Overall	
	SA	AL	CW	SA	AL	CW	SA	AL	CW	SA	AL	CW	Subject Ach	Year End
	4	5	5	5	5	6	7	7	7	-	5	6	5	5

Curriculum for Year

The Junior Science Curriculum is a comprehensive two-year program aimed at preparing students for their subsequent IGCSE biology, chemistry, and physics curricula. Year 1 Science covers a wide array of topics, including (Biology) Laboratory Hazards and Risks in Science; Plant Nutrition, Transport, and Reproduction; and Human Reproduction; (Chemistry) Introduction to Chemistry; Solutions; Separation Techniques; Atoms and Elements; and Mixtures and Compounds; (Physics) Forces; The Earth and Beyond; and Heat and Cooling. Practical skills such as recording data, analysing information, drawing conclusions, and evaluating experimental methods are integral components of this curriculum, which fosters a holistic approach to learning science.

Achievements

Qingchuan has shown a remarkable ability to understand and apply concepts discussed in class. This skill has helped him excel in various assignments, demonstrating a solid grasp of the material and a keen ability to connect theoretical knowledge with practical applications. He has shown good potential in Chemistry and Physics and displays a grasp of most concepts.

Targets for Development

To further enhance Qingchuan's learning experience, he would benefit from focusing on analyzing and evaluating data to conclusions. Developing these skills will deepen his understanding and empower him to make more informed decisions based on the information presented. He would benefit from improving his organization and study habits, particularly in Biology.
